Tables		Page
Chapter 1 - General Summary 2003		
1.1	Estimated population in thousands in each year 1851-1997	9
1.2	Estimated population by age, 1998-2003 in thousands	10
1.3	Population by sex of each County and City according to the Census of Population, 2002	11
1.4	Births, deaths and natural increase and their rates per 1,000 population 1864-2003	12
1.5	Births and deaths by gender 1864-2003	12
1.6	Births and deaths by month and quarter of occurrence 1994-2003	13
1.7	Births, by date of occurrence, in each month during 2003	14
1.8	Deaths, by date of occurrence, in each month during 2003	16
1.9	Births and deaths in 2003 showing place of occurrence and area of normal residence with corresponding particulars for births outside marriage and deaths of infants under one year of age	18
Chapter 2 - Births 2003		
2.1	Total period of fertility rate (TPFR) and age specific fertility rates 1955-2003	26
2.2	Age specific fertility rate and total period fertility rates by area of residence of mother in 2002	27
2.3	Births, by area of residence, sex of infant and age at maternity in 2003	28
2.4	Births by area of residence showing the numbers in each quarter in 2003	30
2.5	Births in 2003, classified by sex and age of mother at maternity and showing the number of births outside marriage	31
2.6	Total births in 2003 classified by area of residence and age of mother at maternity	32
2.7	Births outside marriage in 2003 classified by area of residence and age of mother at maternity	33
2.8	Total births in 2003, classified by age of mother at maternity and number of previous liveborn children	34
2.9	Births outside marriage in 2003, classified by age of mother at maternity and number of previous liveborn children	35
2.10	Births within marriage in 2003, classified by age of mother at maternity and year of marriage	36
2.11	First births within marriage in 2003, classified by age of mother at maternity and year of marriage	37
2.12	Births in 2003, classified by period of gestation and age of mother at maternity	38
2.13	Births in 2003, classified by age of mother at maternity and by birthweight	38
2.14	Births in 2003, classified by period of gestation and birthweight	38
2.15	Births in 2003 showing place of occurrence and area of normal residence	39
2.16	Births in 2003 by day of occurrence and mothers usual residence	40
2.17	Births per 1,000 women in each age group, Ireland, England and Wales, 2003	41
2.18	Number of multiple births and the number of twins per 1,000 maternities 1984-2003	41
2.19	Births by area of residence of mother during 2003 showing separately births outside marriage	42

Tables		Page
2.20	Average age at maternity by area of residence of mother during 2003 showing separately births inside and outside marriage	43
2.21	Births inside and outside marriage and rates per 1,000 population 1864-2003	44
Chapter 3 - Deaths 2003		45
3.1	Average annual number of deaths and death rates from some of the principal causes in each period 1985-87, 1990-92, 1995-97, 2000-02 and 2003	51
3.2	Number of deaths and death rates per 1,000 population from tuberculosis of the respiratory system and from all other forms of tuberculosis, 1941-2003	51
3.3	Age-sex specific death rates per 100,000 population in 2003 by cause in the Eurostat 65 cause of death shortlist	52
3.4	Crude and standardised death rates by area of residence of deceased in 2003	54
3.5	Age-sex specific death rates from cancer (Nos 140-208) per 100,000 corresponding population, 1983-2003	55
3.6	Crude and standardised death rates by area of residence of deceased for cancer (ICD-9 Nos 140-208) in 2003	56
3.7	Deaths and death rates per 100,000 corresponding population in each year 1983 to 2003 from cancer of the larynx, bronchus, trachea and lung, classified by sex and age group	57
3.8	Deaths from accidents, poisoning and violence, 1993-2003	58
3.9	Deaths from accidents, poisonings and violence in 2003 classified by age and sex	58
3.10	Deaths due to accidents in the home in 2003 classified by age and sex	59
3.11	Deaths in 2003 classified by cause in Ireland and Northern Ireland with rates per 100,000 population	60
3.12	Average annual number of deaths for the period 1864-2000 and the number of deaths in the years 1993-2003 classified by sex and age	62
3.13	Average annual death rates for the period 1864-2000 and death rates for the years 1993-2003 per 1,000 corresponding population classified by sex and age	64
3.14	Deaths in 2003, classified by marital status and sex in certain age groups	66
3.15	Deaths occurring in 2003, classified by sex, age and area of residence	67
3.16	Deaths by area of residence in 2003, classified by place of occurrence	73
3.17	Deaths by area of residence showing the numbers occurring in each quarter in 2003	74
3.18	Deaths in 2003 classified by cause, sex and age of deceased	76
3.19	Deaths in 2003 classified by cause, sex and age	78
3.20	Deaths from external causes classified by their natural cause	115
3.21	Deaths in 2003 classified by cause, area of residence and sex	124
3.22	Deaths in 2003 classified by cause and regional authority area of residence	140
3.23	Deaths in 2003 classified by cause, health board area of residence and sex	144
3.24	Deaths by area of residence of deceased and rates per 100,000 population for certain causes	148
Chapter 4 - Infant mortality, stillbirths and maternal mortality 2003		149
4.1	Live births, stillbirths and infant mortality, 1957 to 2003	152
4.2	Live birth, stillbirth and infant mortality rates 1957 to 2003	155
4.3	Stillbirths and infant mortality 2003	156

Tables		Page
4.4	Infant mortality rates per 1,000 live births by detailed age, 1941 to 2003	157
4.5	Comparable stillbirth and perinatal mortality rates in Ireland and neighbouring countries 1980-2003	157
4.6	Infant mortality - deaths under 1 year in 2003, classified by sex, age and cause (International Detailed List)	158
4.7	Infant mortality - deaths at ages under 4 weeks, 4 weeks and under 1 year, in 2003, classified by sex and cause assigned to each province	160
4.8	Infant mortality - deaths under 1 year, in 2003, classified by sex and cause assigned to each regional authority	162
4.9	Infant mortality - deaths under 1 year, in 2003 classified by age group and cause assigned to each regional authority	164
4.10	Infant mortality - deaths under 1 year, in 2003, classified by sex and cause assigned to each health board	166
4.11	Infant mortality - deaths under 1 year, in 2003, classified by age group and cause assigned to each health board	168
4.12	Stillbirths in 2003, classified by cause and sex	170
4.13	Stillbirths in 2003, classified by age of mother, sex of child and period of gestation	171
4.14	Stillbirths in 2003, classified by age of mother and number of previous live and stillborn children	171
4.15	Stillbirths in 2003, classified by cause and period of gestation	172
4.16	Stillbirths in 2003, classified by cause and number of previous children	173
4.17	Stillbirths in 2003, classified by cause and age of mother at maternity	174
4.18	Stillbirths in 2003, classified by cause and weight	175

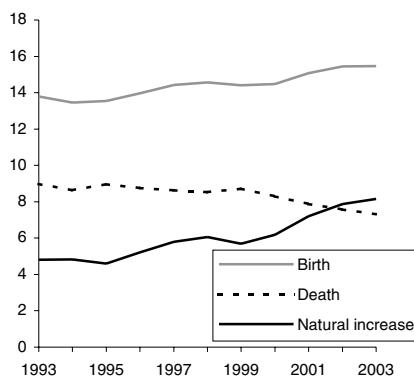

Note: The following pages are blank 6, 20, 75, 176

Appendix

A	Deaths which were registered on the authority of an t-Ard Chlaraitheoir (Registrar General) in 2003, classified by principal groups of causes, sex and age	178
B	Deaths which were registered on the authority of an t-Ard Chlaraitheoir (Registrar General) in 2003, classified by principal groups of causes, sex and year of occurrence	179
C	Deaths from accidents, poisoning and violence which were registered on the authority of an t-Ard Chlaraitheoir (Registrar General) in 2003, classified by sex and age	180
D	Deaths from accidents, poisoning and violence which were registered on the authority of an t-Ard Chlaraitheoir (Registrar General) in 2003, classified by sex and year of occurrence	181

Chapter 1 - General Summary 2003

Rates per 1,000 population

This report has been prepared by the Central Statistics Office for the Minister for Health and Children in accordance with the provisions of Section 2 of the Vital Statistics and Births, Deaths and Marriages Registration Act, 1952.

The main statistics contained in this report have already been published, classified by year of registration, in the CSO Quarterly Vital Statistics reports. This annual report gives a further breakdown in respect of births and deaths which occurred in 2003. The year of occurrence data have been compiled from registration data for 2003 and 2004.

Information on marriages registered in 2003 is not included in the report but will be published separately at a later date.

This report includes statistics on stillbirths which became available following the introduction of a registration system under the Stillbirths Registration Act, 1994, and which replaced the series on late foetal deaths compiled up to 1994.

Births: The number of births which occurred during 2003 was 61,529: 31,455 males and 30,074 females. The birth rate was 15.5 per 1,000 population compared with 15.4 in 2002. The number of births outside marriage which occurred in 2003 was 19,210 or 31% of all births. For more details see Chapter 2.

Deaths: The number of deaths occurring during 2003 was 29,074: 14,882 males and 14,192 females. The death rate was 7.3 per 1,000 population. In 2002 deaths numbered 29,683 and the rate was 7.6. For more details see Chapter 3.

Of the deaths occurring in 2003, 26.2% were due to cancer; 25.4% were due to ischaemic and other forms of heart disease; 12.5% to other diseases of the circulatory system and 15.3% to diseases of the respiratory system. See Table 3.8.

Infant Mortality: During 2003 the number of deaths of infants under one year was 326 compared with 305 in 2002. The corresponding rate increased from 5.0 to 5.3 per 1,000 live births. For more details see Chapter 4.

Stillbirths: The number of stillbirths occurring during 2003 was 345 compared with 364 in 2002. The corresponding rate dropped from 6.0 to 5.6 per 1,000 live and stillborn children. For more details see Chapter 4.

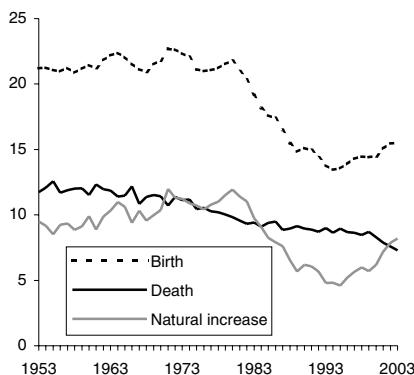

Population: The estimated population in April 2003 was 3,978,900: 1,976,700 males and 2,002,200 females.

Issue of Authority for Registration: Births and deaths (where no inquest has been held) which have not been registered within one year of their occurrence can be registered only on the authority of an t-Ard Chláraitheoir (Registrar General). The tables in the main body of this report exclude such births and deaths. The Appendix to the report contains an analysis of late death registrations in 2003 and of some deaths where an inquest has been held. The number of such deaths registered in 2003 was 495.

More up to date information on Vital Statistics is published in the Quarterly Report on Births, Deaths and Marriages published about five months after the end of the quarter to which the data relate. In the Quarterly Report, births and deaths are classified according to quarter of registration.

Births are classified according to the area of residence of the mother and deaths according to the area of residence of the deceased. Births and deaths for each year since 1943 exclude late registrations; while deaths for each of the years 1940 to 1967 exclude non-residents. From 1968 however, the number of deaths includes non-residents.

Rates per 1,000 population

Tables

Table 1.1 Estimated population in thousands in each year 1851 - 1997

Year	Persons	Males	Females	Year	Persons	Males	Females
1851	5,079	2,486	2,593	1926	2,971	1,507	1,646

Chapter 2 - Births 2003

The number of births which occurred in 2003 was 61,529 comprising 31,455 males and 30,074 females. The corresponding total for 2002 was 60,503, 31,013 males and 29,490 females. The birth rate in 2003 was 15.5 per 1,000 population, 0.1 above 2002.

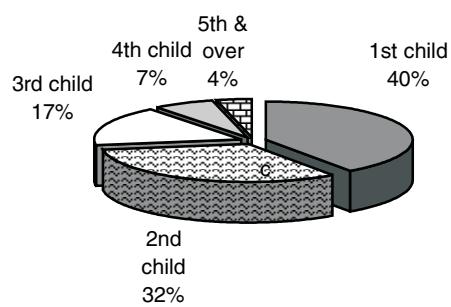

Table I Number of births in Ireland* and birth rates per 1,000 population in Ireland and neighbouring countries, 1941 to 2003

¹ Average annual number of births and birth rates for decennial periods 1941-2000.

Birth Order 2003

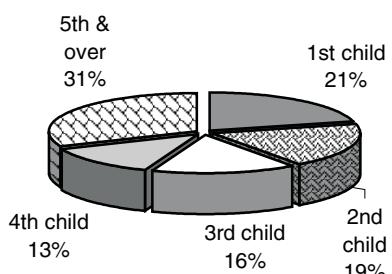

Birth order

A total of 24,334 births (40%) were to first time mothers in 2003. Second time mothers had 19,550 (32%) and third time mothers had 10,326 (17%). On the other hand, only 11% of mothers already had three or more live born children.

Classification by age at maternity, parity and duration of marriage

Table 2.8 shows the total number of births that occurred in 2003 classified by age of mother at maternity and number of previous liveborn children (i.e. parity). The mother's age was not stated in respect of 340 births (or 0.6% of the total). In 2002 the corresponding number was 344 (0.6%). In preparing this table the procedure in the case of multiple births was to count each child as an individual birth. For instance if a fifth pregnancy produced twins, the children would be classified as a fifth and sixth child in birth order.

Birth Order 1955

In 1975 mothers under 30 years accounted for 61.7% of births. The proportion declined fairly steadily to reach 43.4% in 2002 and 42.3% in 2003. In England and Wales, and in Scotland in 2003, 51.2% and 50.6% respectively of mothers were aged under 30.

Table II Percentage distribution of births according to age of mother at maternity in Ireland* in 2002 and 2003 and in England and Wales and Scotland 2003

1 First Births of First Marriage in Scotland.

Table 2.17 compares fertility rates in Ireland and England and Wales in 2003. In most age groups the number of births within marriage per 1,000 married women was considerably higher in Ireland than in England and Wales. The number of births outside marriage (i.e. per 1,000 single, widowed, divorced and separated women) was mostly lower in Ireland than in England and Wales.

The percentage distribution of births within marriage according to the number in previous children in 2002 and 2003 is shown in Table IV and a comparison made with the corresponding distributions in England and Wales and Scotland in 2003.

The percentage distribution of births according to previous number of children changed only slightly between 2002, and 2003, with the trend towards fewer previous children. The percentage of mothers with two or more previous children was higher in Ireland than in either England and Wales or Scotland. In Ireland in 2003, 1.7% of married mothers had 5 or more previous children compared to 1.3% in England and Wales and 0.8% in Scotland.

% of births outside marriage 1922-2003

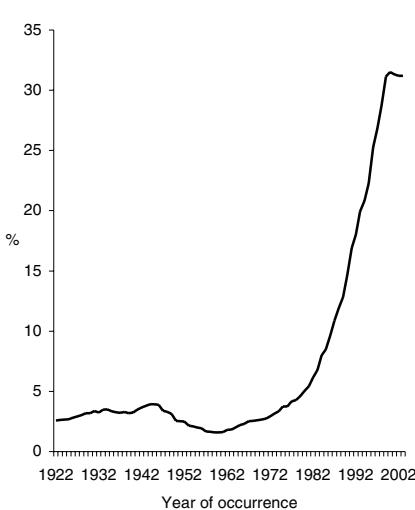

Table IV Percentage distribution of births within marriage according to number of previous children in Ireland in 2002 and 2003 and in England and Wales and Scotland in 2003

Number of previous children	Ireland*		England and Wales		Scotland

Total	100.0	100.0		100.0	100.0

* Exclusive of Northern Ireland.

[†] Includes stillbirths.

Births outside marriage

The total number of births outside marriage was 19,210 in 2003, i.e. 331 more than in 2002. This was equivalent to an annual rate of 31.5 per 1,000 unmarried females aged 15-49 years and was 31.2% of all births (see table 2.5).

The lowest ever number of births outside marriage was recorded in 1959. The graph illustrates the steady increase in the percentage of births outside marriage, notably since 1980.

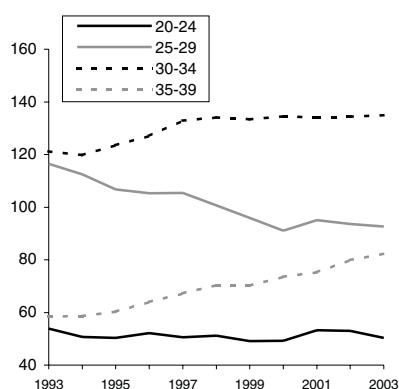

The highest percentage of births outside marriage occurred in Limerick City at 52.1% while the county with the lowest percentage was Galway County at 19.0% (see table 2.19).

Total Period Fertility Rate

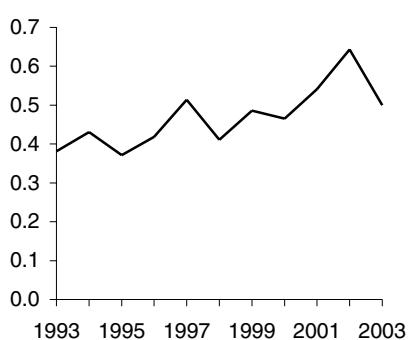

The total period fertility rate (TPFR) derived from the age-specific fertility rates. It gives the theoretical average number of children who would be born alive to a woman during her lifetime if she were to pass through her childbearing years conforming to the age-specific fertility rates of a given year. A value of 2.1 is generally taken to be the level at which a generation would replace itself in the long run, ignoring migration.

The TPFR has fallen by half in the past 30 years. In Ireland, it dropped below the replacement level in 1989 and has remained there since (see table 2.1). Despite the decline, we continue to have one of the highest fertility rates in Western Europe.

Age specific fertility rates - live births per 1,000 females

Domiciliary births percentages

Multiple births

The number of maternities in 2003 which resulted in multiple live births was 922 consisting of 896 sets of twins and 26 sets of triplets. This is equivalent to a "twining rate" of 14.8 (i.e. the number of sets of live twins per 1,000 maternities which resulted in live births). Table 2.18 summarises the number of multiple births and the "twining rate" for the years 1984 to 2003.

Domiciliary births

There were 321 babies born at home in 2003 (see table 2.15). This compares to 410 in 2002. Such births have dropped from one in three births in the early 1950's to only five in every thousand in 2003.

Live births

The terms used in relation to live births are defined as follows:

Parity: parity is the number of previous live born children to a woman.

Birth Order: Birth order is the number of live born children a woman has in the order in which they are born.

Parity and Birth Order: A first birth relates to parity 0 or birth order 1 i.e. birth order = parity + 1.

Crude birth rate (CBR): The number of live births divided by the total population at that age (or age group), multiplied by 1,000.

Age specific fertility rate (ASFR): The number of live births at a certain age (or age group) divided by the female population at that age (or age group) multiplied by 1,000.

Total period fertility rate (TPFR): The sum of the ASFRs, divided by 1,000, i.e. the expected number of children a woman will have in her lifetime based on the fertility of that year.

$$TPFR = \sum_{15}^{49} asfr / 1,000 \cong {}_5 TPFR = 5 \sum_{15-19}^{45-49} asfr / 1,000$$

Age specific reproduction rate (ASRR): The number of female live births at a certain age (or age group) divided by the female population at that age (or age group), multiplied by 1,000.

Gross reproduction rate (GRR): The sum of the ASRRs divided by 1,000 i.e. the expected number of daughters a woman will have in her lifetime based on the fertility of that year.

Net reproduction rate (NRR): The sum of the products of the ASRRs and the expected number of female years to be lived at that age, divided by 1,000 i.e. the GRR adjusted for female mortality.

The difference between the gross and net reproduction rates is an indicator of female mortality.

Average age at maternity: 0.5 plus the sum of the products of the ages at maternity of live births and their ages divided by the number of live births.

$$\text{average age} = 0.5 + \frac{\sum_{x=15}^{49} xf_x}{\sum_{x=15}^{49} f_x}$$

Average age at maternity of first birth: 0.5 plus the sum of the products of the ages at maternity of first live births and their ages divided by the number of first live births.

Childbearing years are regarded as between the ages of 15 and 49.

Live births to mothers aged less than 15 are included in the age 15 category and are divided by the age 15 population. Similarly live births to mothers aged greater than 49 are included in the age 49 category and are divided by the age 49 population.

Average of mean ages: Live births where the age at maternity is not stated are excluded from the calculation.

Tables

Calculation of Total Period Fertility Rate

The TPFR is compiled by summing the age specific fertility rates for the relevant five-year age groups, dividing by 1,000 and multiplying by 5. The small number of births for which the age of the mother is not stated is distributed in proportion to the stated categories.

Table 2.2 Age specific and total period fertility rates by area of residence of mother in 2002

45–49 "	0.5	0.5	0.5	0.5	0.4	0.5
Total 15–49 years	58.4	56.8	95.1	83.3	31.6	39.1

* Exclusive of Northern Ireland; rates use 2003 April population estimates as the denominator.

¹ Since the number of births within marriage in the under 20 age group is small, caution should be exercised in the interpretation of trends in this rate.**Table 2.18 Number of multiple births and the number of twins per 1,000 maternities 1984-2003**

Year	Live births	Maternities which resulted in live issue	Multiple confinements*					Twinning rate
			Twins	Triplets	Quadruplets	Quintuplets	—	
1984	64,062	63,364	733	3	—	—	—	11.6
1985	62,388	61,620	651	6	—	—	—	10.5
1986	61,620	60,993	642	8	—	—	—	10.5
1987	58,433	57,818	625	12	—	—	—	10.8
1988	54,600	53,981	639	5	—	—	—	11.8
1989	52,018	51,398	626	7	—	—	—	12.2
1990	53,044	52,425	649	8	—	1	—	12.4
1991	52,718	52,142	610	6	2	—	—	11.7
1992	51,089	50,505	602	8	3	—	—	11.9
1993	19,304	48,748	574	13	—	—	—	11.8
1994	48,255	47,670	602	14	1	—	—	12.6
1995	48,787	48,138	674	16	—	—	—	14.0
1996	50,655	49,996	675	22	—	—	—	13.5
1997	52,775	52,071	737	26	1	—	—	14.2
1998	53,969	53,262	742	22	1	—	—	13.9
1999	53,924	53,192	728	29	—	—	—	13.7
2000	54,789	54,084	726	16	1	—	—	13.4
2001	57,854	56,962	891	24	2	1	—	15.6
2002	60,503	59,620	890	18	3	—	—	14.9
2003	61,529	60,645	896	26	—	—	—	14.8

* The above statistics are based on a revised methodology which takes better account of multiple births in which a baby was stillborn.

Chapter 3 - Deaths 2003

There were 29,074 deaths in Ireland in 2003, of which 14,882 were males and 14,192 were females. This is equivalent to a rate of 7.3 deaths per 1,000 total population compared to 7.6 in 2002 and 7.9 in 2001.

Table 3.13 shows the annual average death rates, by age group, for decennial periods from 1864 to 2000 and the death rates for each year 1993 to 2003. While the crude death rate per 1,000 population has shown a gradual downward trend since the beginning of the century, striking long-term falls occurred in the death rates at the younger ages.

Table I compares the death rates in the years 1941-2003 with those in Northern Ireland, England and Wales and Scotland. The death rate in this country in 2003 was lower than in Northern Ireland, England and Wales and Scotland. Over the period covered in the table the decrease in this country has been greater than that in any of the other areas. These comparisons are based on crude death rates, which are to some extent affected by differences in the age-sex structures of the population in the different countries, while comparisons over a period of years are also affected by changes in the age-sex structures of the population.

Table I Death rates per 1,000 population in Ireland* and neighbouring countries, 1941-2003

Period	Number of deaths (000's) Ireland*	Death rate per 1,000 population			
		Ireland*	Northern Ireland	England and Wales	Scotland

* Exclusive of Northern Ireland

¹ Average annual number of deaths and death rates for decennial periods from 1941-2000

Standardised death rates comparison between counties

Variations in the age distribution of the population from one county to another have an effect on the comparability of death rates between counties. If a particular county contains a large proportion of elderly persons the crude death rate per 1,000 population will be relatively high even if the health conditions in that county are better than the general average. In an attempt to overcome this standardised rates are prepared. For a particular county this is done by calculating the death rate in each age group of the population in that county and then multiplying the death rate in each age group by the population in the whole country in that age group and summing the resulting products. See table 3.4. Throughout the remainder of the report, only crude death rates will be reported.

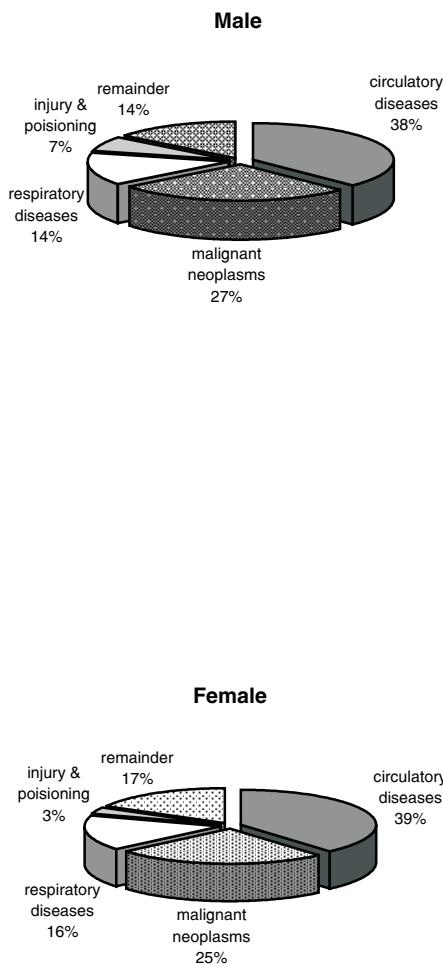

In certain areas the standardised death rates differ appreciably from the crude rates, the extremes being Fingal which had a crude death rate of 4.24 and a standardised rate of 7.23 (reflecting the very young age structure in Fingal) and Leitrim where the standardisation had the effect of lowering the crude death rate from 12.02 to 8.39 because of the comparatively older age distribution in

that county. The standardised rates in 2003 were lowest in Dun Laoghaire-Rathdown (at 5.56 per thousand) and highest in Limerick City (9.70 per thousand).

Causes of Death

The Ninth Revision of the International classification of Diseases, Injuries and Causes of Death (ICD-9), as recommended by the World Health Organisation, has been used to classify deaths in Ireland by cause since 1979. It replaced the Eight Revision (ICD-8) which was used from 1968 - 1978. To facilitate linkage with previous years all deaths in 1979 were, in addition, coded according to ICD-8. A cross-classification of deaths occurring in 1979 by the ICD-8 and ICD-9 classifications is contained in tables 60-63 of the 1979 Report. As ICD-9 imposed certain changes in interpretation of recorded medical opinion regarding the underlying cause of death when more than one disease is mentioned on the medical certificate of cause of death, care should be taken in comparing deaths coded according to ICD-9 with those prior to 1979.

Injury and Poisoning: This category forms part of the main body of classification in ICD-9 and deaths coded accordingly are shown in table 3.19.

External Causes of Death: In the Sixth, Seventh and Eighth Revisions the E-code was considered as part of the main classification. In ICD-9 the E-code is treated as a supplementary classification to be used where relevant in conjunction with codes from any part of the main classification.

Of the deaths occurring in 2003, 75% were due to the four main causes, i.e. Ischaemic and other forms of heart disease, malignant neoplasms, cerebrovascular disease and respiratory diseases. Most of these deaths occurred at ages over 65 (see table 3.18).

Malignant neoplasms were responsible for the highest rates, 203 per 100,000 population for males and 179 per 100,000 females. Diseases of the heart were the next major cause, the rates for which were 201 and 171 for males and females respectively per 100,000 population. The rates for cerebrovascular disease were 49 and 66 respectively for males and females per 100,000 population. The deaths from respiratory diseases were due mainly to pneumonia. Table 3.19 contains more information on deaths classified by causes and age groups.

Some of the principal causes of deaths are considered in greater detail in the following sections.

Tuberculosis

In 2003 there were 37 deaths from tuberculosis, of which 18 were caused by the respiratory form and 19 by other forms of the disease see table 3.2. Deaths from tuberculosis are now only at a fraction of their level 50 years ago. All of the 37 deaths in 2003 were in the age group 55 and over.

The mortality from tuberculosis in the counties and cities in 2003 is presented in table 3.24 of this Report.

Cancer

Table 3.5 shows the death rate from cancer in certain age groups in the years 1983 to 2003.

In 2003 the male death rate for all ages was 13% above that for females.

For comparability with the years prior to 1950 the total cancer figure less Hodgkin's disease and leukaemia should also be shown. In 2003 there were 7,603 deaths from cancer (Nos. 140 to 208). Of this number 21 deaths were caused by Hodgkin's disease and 247 by leukaemia and aleukaemia.

In the period under review the crude rates for England and Wales and Scotland were consistently higher than those for this country and Northern Ireland.

Table II Deaths from cancer (nos. 140-208) per 1,000 population in Ireland* and neighbouring countries, 1983-2003

Year	Ireland*	Northern Ireland	England and Wales	Scotland
1983	1.85	2.03	2.68	2.76
1984	1.89	2.12	2.78	2.78
1985	1.89	2.07	2.80	2.81
1986	1.95	2.06	2.78	2.84
1987	1.96	2.14	2.80	2.87

1997	2.04	2.14	2.60	2.91
1998	2.02	2.10	2.60	2.90
1999	2.01	2.10	2.50	2.90
2000	2.02	2.10	2.40	2.90
2001	1.98	2.19	2.70	3.00
2002	1.92	2.15	2.70	3.00
2003	1.91	2.21	2.64	3.00

*Exclusive of Northern Ireland

The death rates from cancer in 2003 in counties and cities are compared in Table 3.6. Standardised rates, which reduce the effect of different age distributions in the different areas, are also shown. The crude death rate from cancer in 2003 varied from 2.98 per 1,000 population in Leitrim to 1.03 in South Dublin. When comparing the relative seriousness of mortality in different counties it is, of course, the standardised rates which should be used. In the counties of the west and north-west, standardisation generally had the effect of lowering the death rates considerably. Again, throughout the remainder of this report, only crude death rates will be reported.

Full details of deaths due to cancer occurring in 2003, classified by disease and age group are contained in table 3.19. The death rates from cancer per 100,000 in each group for the main groups of sites are shown in table 3.3, which shows that there is, in general, a rapid rise in the death rate with increasing age.

The number of deaths and death rates from cancer of the larynx, bronchus, trachea and lung in each year 1983 to 2003, classified by sex and age group, are shown in table 3.7.

Table III Deaths and death rates in Ireland* and neighbouring countries from cancer of the bronchus, trachea and lung in each year 1984 to 2003

Year	Ireland*	Northern Ireland	England and Wales	Scotland
Number of Deaths

2003	40	48	55	77

Diseases of the circulatory system

There were 11,038 deaths ascribed to diseases of the circulatory system (Nos.390-459) in 2003, of which 5,572 were deaths of males and 5,466 of females. Details of these deaths, classified by cause and age may be obtained from table 3.19 of this report while the numbers assigned to each county and city are shown in table 3.21.

The excess of male over female deaths is largely reflected in the number of deaths from ischaemic heart disease, 3,120 males, compared with 2,463 females, the majority of which were due to myocardial infarction (1,742 males compared with 1,418 females). See table 3.19. The converse is true for cerebrovascular disease (1,313 females compared with 963 males). In respect of the remaining groups of causes the difference between the male and female death rates is not nearly so pronounced.

Respiratory Diseases

Deaths from respiratory diseases (Nos. 460-519 in the International List) in 2003 numbered 4,454. These included 2,209 deaths from pneumonia, 64 from asthma, 6 from influenza and 2,175 due to other respiratory diseases.

Accidents, poisoning and violence

The number of deaths from external causes numbers E800-E999) occurring in 2003 was 1,601 of which 1,108 were males and 493 were females. The corresponding figures for 2002 were 1,768 deaths – 1,248 male and 520 female. As has been mentioned deaths which have not been registered within one year of their occurrence have been excluded from the main body of this report. The exclusion of these cases may have a relatively more significant effect on the number of deaths classified to some external causes. See table 3.8.

As can be seen from table 3.9 there is an excess of male mortality from accidents which may be largely attributed to the category suicide and self-inflicted injury followed by road vehicle accidents. At ages over 75 years, the excess of female deaths may be attributed to accidental falls.

As can be seen from table 3.10, 290 deaths resulted from accidents in the home. This compares with 346 in 2002. Of the 290 deaths in 2003, 173 were accidental falls, and over half of these were in the 75 years and over category. Accidents caused by fire and flames accounted for 31 deaths, 2 of which were in the under 5 age group. There were 50 deaths from accidental poisoning.

Uncertified deaths

There were 11 cases in 2003 in which the cause of death was not certified by a medical practitioner, which represents 0.04% of the total deaths. This is much lower than the 8.5% in the period 1951-1960 and the 3.1% in the period 1961-1970.

Inquests and post-mortems

The number of deaths registered on certificates issued by coroners as a result of inquest and post-mortem examinations during 2003 was 4,427 compared with 4,594 in 2002.

Tables

Table 3.1 Average annual number of deaths and death rates from some of the principal causes in each period 1980-82, 1985-87, 1990-92, 1995-97, 2000-02 and 2003

Table 3.20 Deaths from external causes classified by their natural cause

ICD 9 cause of death descriptions	Male	Female	Total
E805 Hit by rolling stock	-	1	1
869 Internal injury to unspecified or ill-defined organs	-	1	1
E811 Motor vehicle traffic accident involving re-entrant collision with another motor vehicle	-	1	1
807 Fracture of rib(s), sternum, larynx and trachea	-	1	1
E812 Other motor vehicle traffic accident involving collision with another motor vehicle	1	-	1
799 Other ill-defined and unknown causes of morbidity and mortality	6	-	6
803 Other and unqualified skull fractures	2	1	3
805 Fracture of vertebral column without mention of spinal cord lesion	1	-	1
807 Fracture of rib(s), sternum, larynx and trachea	1	-	1
829 Fracture of unspecified bones	1	-	1
852 Subarachnoid, subdural and extradural haemorrhage, following injury	1	-	1
854 Intracranial injury of other and unspecified nature	9	1	10
862 Injury to other and unspecified intrathoracic organs	-	1	1
868 Injury to other intraabdominal organs	2	-	2
869 Internal injury to unspecified or ill-defined organs	38	10	48
901 Injury to blood vessels of thorax	1	1	2
952 Spinal cord lesion without evidence of spinal bone injury	1	-	1
958 Certain early complications of trauma	2	-	2
994 Effects of other external causes	1	2	3
	66	16	82
E813 Motor vehicle traffic accident involving collision with other vehicle	3	1	4
803 Other and unqualified skull fractures	1	-	1
805 Fracture of vertebral column without mention of spinal cord lesion	1	-	1
851 Cerebral laceration and contusion	1	-	1
852 Subarachnoid, subdural and extradural haemorrhage, following injury	1	-	1
854 Intracranial injury of other and unspecified nature	5	-	5
862 Injury to other and unspecified intrathoracic organs	2	-	2
869 Internal injury to unspecified or ill-defined organs	8	2	10
901 Injury to blood vessels of thorax	1	-	1
	22	3	25
E814 Motor vehicle traffic accident involving collision with pedestrian	-	1	1
799 Other ill-defined and unknown causes of morbidity and mortality	4	1	5
803 Other and unqualified skull fractures	1	1	2
805 Fracture of vertebral column without mention of spinal cord lesion	1	-	1
807 Fracture of rib(s), sternum, larynx and trachea	1	-	1
808 Fracture of pelvis	-	1	1
829 Fracture of unspecified bones	-	1	1
854 Intracranial injury of other and unspecified nature	9	5	14
861 Injury to heart and lung	1	-	1
862 Injury to other and unspecified intrathoracic organs	-	1	1
864 Injury to liver	1	-	1
869 Internal injury to unspecified or ill-defined organs	18	7	25
926 Crushing injury of trunk	1	-	1
929 Crushing injury of multiple and unspecified sites	1	1	2
959 Injury, other and unspecified	3	2	5
	40	21	61
E815 Other motor vehicle traffic accident involving collision on the highway	1	-	1
348 Other conditions of brain	5	-	5
803 Other and unqualified skull fractures	3	-	3
805 Fracture of vertebral column without mention of spinal cord lesion	1	-	1
807 Fracture of rib(s), sternum, larynx and trachea	8	-	8
854 Intracranial injury of other and unspecified nature	3	-	3
861 Injury to heart and lung	3	-	3
864 Injury to liver	3	1	4
869 Internal injury to unspecified or ill-defined organs	17	3	20
901 Injury to blood vessels of thorax	3	-	3
959 Injury, other and unspecified	1	-	1
	45	4	49
E816 Motor vehicle traffic accident due to loss of control, without collision on the highway	2	-	2
803 Other and unqualified skull fractures	1	-	1
805 Fracture of vertebral column without mention of spinal cord lesion	1	-	1
807 Fracture of rib(s), sternum, larynx and trachea	2	-	2
854 Intracranial injury of other and unspecified nature	-	1	1
864 Injury to liver	3	1	4
869 Internal injury to unspecified or ill-defined organs	1	-	1
994 Effects of other external causes	10	2	12
E818 Other noncollision motor vehicle traffic accident	1	-	1
348 Other conditions of brain	1	-	1
803 Other and unqualified skull fractures	1	-	1
804 Multiple fractures involving skull or face with other bones	1	-	1
869 Internal injury to unspecified or ill-defined organs	2	-	2

ICD 9 cause of death descriptions	Male	Female	Total
E880 Fall on or from stairs or steps			
808 Fracture of pelvis	1	-	1
821 Fracture of other and unspecified parts of femur	-	1	1
839 Other, multiple and ill-defined dislocations	-	1	1
852 Subarachnoid, subdural and extradural haemorrhage, following injury	3	1	4
854 Intracranial injury of other and unspecified nature	13	9	22
869 Internal injury to unspecified or ill-defined organs	-	1	1
924 Contusion of lower limb and of other and unspecified sites	1	-	1
959 Injury, other and unspecified	1	-	1
	30	19	49
E881 Fall on or from ladders or scaffolding			
803 Other and unqualified skull fractures	1	-	1
808 Fracture of pelvis	1	-	1
854 Intracranial injury of other and unspecified nature	5	-	5
	7	-	7
E882 Fall from or out of building or other structure			
803 Other and unqualified skull fractures	3	-	3
854 Intracranial injury of other and unspecified nature	5	1	6
869 Internal injury to unspecified or ill-defined organs	3	1	4
	11	2	13
E883 Fall into hole or other opening in surface			
803 Other and unqualified skull fractures	1	-	1
	1	-	1
E884 Other fall from one level to another			
303 Alcohol dependence syndrome	1	-	1
459 Other disorders of circulatory system	-	1	1
803 Other and unqualified skull fractures	2	1	3
806 Fracture of vertebral column with spinal cord lesion	2	-	2
820 Fracture of neck of femur	2	14	16
821 Fracture of other and unspecified parts of femur	4	3	7
852 Subarachnoid, subdural and extradural haemorrhage, following injury	2	3	5
854 Intracranial injury of other and unspecified nature	5	-	5
864 Injury to liver	1	-	1
869 Internal injury to unspecified or ill-defined organs	2	1	3
	21	23	44
E885 Fall on same level from slipping, tripping or stumbling			
803 Other and unqualified skull fractures	1	2	3
807 Fracture of rib(s), sternum, larynx and trachea	1	-	1
808 Fracture of pelvis	1	3	4
812 Fracture of humerus	1	2	3
813 Fracture of radius and ulna	-	1	1
818 Ill-defined fractures of upper limb	-	1	1
820 Fracture of neck of femur	12	23	35
821 Fracture of other and unspecified parts of femur	4	10	14
822 Fracture of patella	-	1	1
823 Fracture of tibia and fibula	1	2	3
824 Fracture of ankle	1	1	2
852 Subarachnoid, subdural and extradural haemorrhage, following injury	-	1	1
854 Intracranial injury of other and unspecified nature	4	4	8
958 Certain early complications of trauma	1	-	1
959 Injury, other and unspecified	1	1	2
	28	52	80
E886 Fall on same level from collision, pushing or shoving, by or with other person			
854 Intracranial injury of other and unspecified nature	1	-	1
	1	-	1
E887 Fracture, cause unspecified			
803 Other and unqualified skull fractures	2	-	2
805 Fracture of vertebral column without mention of spinal cord lesion	-	1	1
807 Fracture of rib(s), sternum, larynx and trachea	-	1	1
808 Fracture of pelvis	1	-	1
818 Ill-defined fractures of upper limb	1	-	1
820 Fracture of neck of femur	8	13	21
821 Fracture of other and unspecified parts of femur	2	4	6
824 Fracture of ankle	1	-	1
829 Fracture of unspecified bones	1	-	1
835 Dislocation of hip	-	1	1
	16	20	36
E888 Other and unspecified fall			
303 Alcohol dependence syndrome	1	-	1
428 Heart failure	1	-	1
429 Ill-defined descriptions and complications of heart disease	1	-	1
436 Acute but ill-defined cerebrovascular disease	-	1	1
486 Pneumonia, organism unspecified	1	-	1
800 Fracture of vault of skull	1	-	1

854 Intracranial injury of other and unspecified nature	2	1	3
868 Injury to other intraabdominal organs	1	-	1
869 Internal injury to unspecified or ill-defined organs	1	-	1
959 Injury, other and unspecified	1	1	2
987 Toxic effect of other gases, fumes or vapours	-	1	1
994 Effects of other external causes	1	-	1
	7	3	10
E980 Poisoning by solid or liquid substances, undetermined whether accidentally or purposely inflicted			
304 Drug dependence	5	3	8
414 Other forms of chronic ischaemic heart disease	1	-	1
965 Poisoning by analgesics, antipyretics and antirheumatics	7	5	12
968 Poisoning by other central nervous system depressants	1	-	1
969 Poisoning by psychotropic agents	7	2	9
977 Poisoning by other and unspecified drugs and medicaments	1	-	1
980 Toxic effect of alcohol	2	4	6
	24	14	38
E981 Poisoning by gases in domestic use, undetermined whether accidentally or purposely inflicted			
987 Toxic effect of other gases, fumes or vapours	1	-	1
	1	-	1
E982 Poisoning by other gases, undetermined whether accidentally or purposely inflicted			
986 Toxic effect of carbon monoxide	1	-	1
	1	-	1
E983 Hanging, strangulation or suffocation, undetermined whether accidentally or purposely inflicted			
994 Effects of other external causes	4	1	5
	4	1	5
E984 Submersion (drowning), undetermined whether accidentally or purposely inflicted			
994 Effects of other external causes	13	6	19
	13	6	19
E985 Injury by firearms and explosives, undetermined whether accidentally or purposely inflicted			
853 Other and unspecified intracranial haemorrhage following injury	1	-	1
854 Intracranial injury of other and unspecified nature	1	-	1
875 Open wound of chest (wall)	1	-	1
879 Open wound of other and unspecified sites, except limbs	1	-	1
	4	-	4
E986 Injury by cutting and piercing instruments, undetermined whether accidentally or purposely inflicted			
900 Injury to blood vessels of head and neck	1	-	1
	1	-	1
E987 Falling from high place, undetermined whether accidentally or purposely inflicted			
803 Other and unqualified skull fractures	1	-	1
869 Internal injury to unspecified or ill-defined organs	1	-	1
	2	-	2
E988 Injury by other and unspecified means, undetermined whether accidentally or purposely inflicted			
780 General symptoms	-	1	1
799 Other ill-defined and unknown causes of morbidity and mortality	1	1	2
803 Other and unqualified skull fractures	1	-	1
852 Subarachnoid, subdural and extradural haemorrhage, following injury	-	2	2
854 Intracranial injury of other and unspecified nature	4	2	6
869 Internal injury to unspecified or ill-defined organs	-	1	1
901 Injury to blood vessels of thorax	1	-	1
949 Burn, unspecified	1	-	1
959 Injury, other and unspecified	1	-	1
	9	7	16

Chapter 4 - Infant Mortality, Stillbirths and Maternal Mortality 2003

Infant and neonatal mortality rates per 1,000 live births

Infant mortality

During the year 2003 there were 326 deaths of infants under one year, compared to 305 in 2002. The infant mortality rate, which was 5.0 per 1,000 births in 2002, increased to 5.3 in 2003.

Table I Infant mortality rates in Ireland* and neighbouring countries, 1941-2003

Period	Deaths of infants under 1 year per 1,000 live births			
	Ireland	Northern Ireland	England and Wales	Scotland
1941-1950 ¹	66	60	43	57

2000	6	6	6	6
2001	6	6	5	6
2002	5	5	5	5
2003	5	5	5	5

¹ Decennial average.

* Exclusive of Northern Ireland.

Infant Mortality by detailed age

There were 233 neonatal deaths in 2003, an increase of 17 on the 2002 figure. The neonatal mortality rate of 3.8 per 1,000 live births was 0.2 above the 2002 figure (see tables 4.1 and 4.2). Table II shows infant deaths by detailed age.

Infant Mortality by cause

The causes of deaths of infants under one year, classified according to the Detailed International List, are shown in table 3.19. In table 4.6 infant deaths are again classified by cause and a more detailed age classification shown.

The relative importance of the various groups of causes differs appreciably between deaths of infants aged under one week and deaths at ages 4 weeks to 1 year. Of all deaths at ages under one week, 51% were due to congenital anomalies. The most common cause of death for infants aged 4 weeks to 1 year was sudden death (39%) followed by congenital anomalies (31%). See table 4.6.

Infant Mortality by area

Table 4.3 shows that the highest rate for infant mortality was in Limerick City and the lowest was in Sligo. The rate for perinatal mortality was highest in Monaghan and lowest in Leitrim, in 2003. Further breakdowns by health board and regional authority are available in tables 4.8 to 4.11 by sex and age.

Stillbirth (28+ weeks) and perinatal mortality rates per 1,000 live and stillborn children**Stillbirth (28+ weeks) and perinatal mortality rates per 1,000 live and stillborn children**

Stillbirths

While statistics of infant mortality are obtained in the course of the usual procedure for registration of deaths, which has been in operation since 1863, particulars of late foetal mortality have been obtained through a scheme of notification to the Directors of Community Care. The scheme of notifying late foetal deaths was introduced in 1957, but comparisons between different areas of the country showed marked differences in the coverage of the scheme in the early years. Consequently, the number of late foetal deaths in the early years of the scheme is believed to be understated.

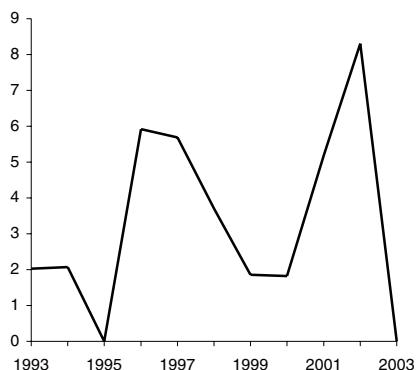

In 1995 stillbirths were registered in Ireland for the first time under the Stillbirths Registration Act, 1994. The definition of a stillbirth under the Act is broader than the definition used for late foetal deaths in previous Vital Statistics Reports . This report contains tables in relation to 345 stillbirths which occurred in 2003 including 5 for which a statistical return was received and which had not been registered. This compares with 364 stillbirths in 2002. Care should be taken in comparing statistics on stillbirths and late foetal deaths in consideration of the changes between the notification and registration systems.

For stillbirths the highest rate was in Monaghan and there were none in Leitrim. (see table 4.3).

Deaths classified as being due to ill-defined conditions originating in the perinatal period accounted for 39% of the stillbirths. (see table 4.12).

Table III Stillbirths in 2003 classified by period of gestation and place in which confinement occurred

Maternal death rates per 100,000 live births

Period of Gestation	Place of confinement			
	Hospital	Maternity Home	Domiciliary	Total
Under 24 weeks	13	2	-	15
24-27 weeks	63	2	-	65
28-36 weeks	117	5	3	125
37 weeks and over	131	2	-	133
Not stated	7	-	-	7
TOTAL	331	11	3	345

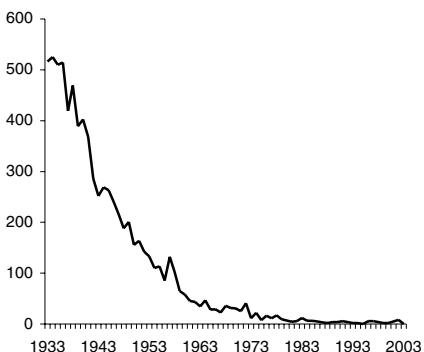

As can be seen from table III 331 stillbirths in 2003 occurred in hospitals; this is equivalent to 96% of the total numbers of stillbirths. The perinatal mortality and stillbirth rates in Ireland and neighbouring countries from 1980 to 2003 are compared in table 4.5.

Pregnancy, childbirth and puerperium

There were no maternal deaths in 2003, compared with 5 in 2002. Table IV compares Ireland and the neighbouring countries for the years 1990-2003.

Table IV Maternal deaths per 100,000 total live and stillbirths in Ireland¹ and neighbouring countries; 1990-2003

Maternal death rates per 100,000 live births

¹ Exclusive of Northern Ireland.

* One maternal death which occurred in 1993 was registered in 1995.

Stillbirths and Infant Mortality

The terms used in relation to stillbirths and infant mortality are defined as follows:

Stillbirth: Stillbirth weighing 500 grams or more or at gestational age of 24 weeks or more. This definition applies to stillbirth figures from 1995 onwards.

Late foetal death: Foetal death at or over 28 weeks gestation. This definition was applied up to 1994 inclusive.

Early neonatal death: Death at ages under 1 week of live born infant.

Perinatal deaths: Stillbirths or late foetal deaths plus early neonatal deaths.

Late neonatal death: Death between the ages of 1 week and 4 weeks of live born infant.

Neonatal death: Death at ages under 4 weeks of live born infant.

Post neonatal death: Death between the ages of 4 weeks and 1 year of live born infant.

Infant death: Death at ages under 1 year of live born infant.

Stillbirth rate: Stillbirths divided by total live births plus stillbirths, multiplied by 1,000.

Late foetal mortality rate: Late foetal deaths divided by total live births plus late foetal deaths, multiplied by 1,000.

Early neonatal mortality rate: Early neonatal deaths divided by total live births, multiplied by 1,000.

Perinatal mortality rate: Perinatal deaths divided by total live births plus stillbirths, multiplied by 1,000.

Late neonatal mortality rate: Late neonatal deaths divided by total live births, multiplied by 1,000.

Neonatal mortality rate: Neonatal deaths divided by total live births, multiplied by 1,000.

Post neonatal mortality rate: Post neonatal deaths divided by total live births, multiplied by 1,000.

Infant mortality rate: Infant deaths divided by total live births, multiplied by 1,000.
