General Details

Introduction

A Census of Population was taken on the night of Sunday, 23 April 2006, in accordance with the Statistics (Census of Population) Order 2005 (S.I. No. 786 of 2005)¹. An extract from the census questionnaire is reproduced in Appendix 1.

This tenth volume of the detailed report contains results relating to the population aged 15 years and over classified by age at which full time education ceased, highest level of education completed and third level qualifications held.

Subsequent census volumes will analyse the population by such characteristics as travel to work, disability, religion, etc.

Coverage of the Census

The census figures relate to the *de facto* population, i.e. the population recorded for each area represents the total of all persons present within its boundaries on the night of Sunday, 23 April 2006, together with all persons who arrived in that area on the morning of Monday, 24 April 2006, not having been enumerated elsewhere. Persons on board ships in port are included with the population of adjacent areas. The figures, therefore, include visitors present on census night as well as those in residence, while usual residents temporarily absent from the area are excluded from the census count.

A limited number of questions, relating mainly to demographic characteristics, were asked in respect of usual residents who were temporarily absent from their households on census night. The responses to these questions enables a more precise picture to be built up on families and households by excluding visitors present on census night and including residents who were temporarily absent.

Conduct of the Census

A temporary field force consisting of 6 Census Liaison Officers, 40 Regional Supervisors, 400 Field Supervisors and some 4,400 part-time Enumerators carried out the census enumeration. During the four weeks before Census Day the enumerators entered details in respect of 1.77 million private residences and communal establishments in their enumerator record books. They simultaneously delivered blank census questionnaires to 1.5 million of these dwellings that were expected to be occupied on census night. Approximately 266,000 residences were vacant at the time of the census while in a further 30,000 cases the household was either enumerated elsewhere or temporarily absent from the State. The collection of completed questionnaires took place between Monday 24 April and Monday 22 May 2006.

Production of Results

Each enumerator first prepared and returned to the CSO a summary of the population in his/her enumeration area. These summaries formed the basis for the preliminary 2006 population results². The completed questionnaires for individual households were subsequently transported to the CSO for processing.

The population summaries, dwelling listings and enumeration maps for individual enumeration areas were checked for consistency and used to determine the boundaries of census towns and suburbs/environs of towns with legal boundaries. The capture and processing of the responses to questions on the census questionnaire proceeded concurrently.

¹ The Statistics (Census of Population) Order 2005 was made by the Minister of State at the Department of the Taoiseach in pursuance of powers conferred on him by section 25 (1) of the Statistics Act 1993 (No. 21 of 1993) and the Statistics (Delegation of Ministerial Functions) Order 2004 (S.I. No. 664 of 2004).

² Census of Population of Ireland, 2006: Preliminary Report (Prn. A6/0988), July 2006.

Publication of Results

The planned publication schedule is set out in Appendix 9. The schedule consists of the Principal Demographic Results and Principal Socio-economic Results, which provide the main census results, primarily at national level. More detailed data is provided in 13 subject matter reports. All of the tables published in these reports will be made available on the Central Statistics Office web site (www.cso.ie) using Beyond 20/20 interactive software. This software gives Internet users the ability to select and view data online and then download the same data to their computers.

2006 Census questionnaire

The attached extract is taken from the household form used in the 2006 Census. The household form covers 6 persons and consists of 24 pages. The attached extract covers persons 1 and 2 only. The layouts for persons 3 to 6 are identical to that for person 2, apart from the relationship question (Q3).

Central Statistics Office
An Phríomh-Oifig Staidrimh

Daonáireamh na hÉireann Census of Population of Ireland Sunday 23 April 2006

About the Census

The Census takes place every five years and counts all the people and households in the country. The census results will give a comprehensive picture of the social and living conditions of our people and will provide vital information necessary for planning Ireland's future.

Participation is compulsory

The Census is being taken under the Statistics Act, 1993 and the Statistics (Census of Population) Order, 2005. Under Section 26 of the Statistics Act, 1993, you are obliged by law to complete this form. Any person who fails or refuses to provide this information or who knowingly provides false information may be subject to a fine of up to €25,000.

Confidentiality is guaranteed

The confidentiality of your Census return is legally guaranteed by the Statistics Act, 1993. The Central Statistics Office will use the information you provide for statistical purposes only. This includes the production of statistical tables and analytical reports and the selection of samples for some of our surveys.

Census Enumerator

Your Census Enumerator will assist you if you have difficulty completing your Census form or if you have any questions about the Census.

Thank you for your co-operation.

Who should complete the Census form?

The householder or any adult member of the household present on the night of Sunday 23 April 2006 should complete the form.

Each household should complete a separate Household Form.

A household is:

- one person living alone or
- a group of related/unrelated people living at the same address with common housekeeping arrangements, that is, sharing at least one meal a day or sharing a living room or sitting room.

If you have any queries

Talk to your Census Enumerator if:

- there is more than one household at your address (*each will need their own Household Form*);
- there are more than 6 persons in the household (*you will need an Individual Form for each additional person*).

How to complete your Census form

1. The form should be completed on the night of Sunday 23 April.
2. Please answer questions about your accommodation on page 2.
3. Identify on page 3:
 - all persons (including visitors) who spent the night of Sunday 23 April in the household;
 - any household members who are usually resident in the household but who are temporarily away on the night of Sunday 23 April.
4. Answer the questions beginning on page 4 for all persons present on the night of Sunday 23 April.
5. Answer the questions on pages 22-23 in respect of any household members temporarily away on the night of Sunday 23 April.
6. Sign the declaration on the back page.

Have your completed form ready for collection

The Enumerator will call to collect your completed Census form on Monday 24 April or soon afterwards and will assist you if you have any difficulties. If for any reason the form has not been collected by Monday 22 May 2006, please return it to our FREEPOST address which is Central Statistics Office, PO Box 2006, FREEPOST 3985, Swords, Co Dublin.

For the 1991 and previous censuses, the geographical sub-divisions used were Planning Regions.

Appendix 2 (contd.)

Education

As in Census 2002, persons aged 15 years and over were asked 3 questions on education in Census 2006. The first question asked if a person had ceased their full time education. If they had answered 'yes', they were then asked the age at which it ceased. The second question asked what was the highest level of education (full or part time) completed to date. The levels ranged from no formal education to a tertiary post doctorate degree. The final question asked if a person held a third level qualification gained after completing 2 or more years of study. If a third level qualification was held, then the person was asked what were the main subject areas studied. A choice of ten, different subject areas were set out in this question for the person to tick.

Labour Force

The results of the Quarterly National Household Survey (QNHS) provide the basis for the official series of quarterly labour force estimates. The labour force and its constituent figures shown in this report are directly based on the census. Users should be aware that information derived from identical questions in the census and QNHS for the same year may show appreciable differences. The main categories affected are the constituents of the question on principal economic status and the employment estimates classified by industry and occupation. The main reasons for the differences are:

- the census form is completed by a responsible adult in each household throughout the State in respect of everyone present in the household on census night while the QNHS is by face to face interview
- the census relates to all persons present in the State (including visitors from abroad) at the time of the census while the QNHS covers persons usually resident in Ireland
- the census is a complete enumeration while the QNHS is a sample survey
- the QNHS has a much wider range of questions on the labour force which may have a bearing on the responses received to individual questions.

Occupation

The Occupation classification (set out in Appendix 3) used in the census, is based on the UK Standard Occupational Classification³, with modifications to reflect Irish labour market conditions. The classification was first used in the 1996 Census. This classification adheres to the international occupation classification ISCO Com (88) and provides a link to ISCO Com (88). The hierarchical structure provided within this classification is suited to accurate automatic coding.

The code to which a person's occupation is classified is determined by the kind of work he or she performs in earning a living, irrespective of the place in which, or the purpose for which, it is performed. The nature of the industry, business or service in which the person is working has no bearing upon the classification of the occupation. For example, the occupation "clerk" covers clerks employed in manufacturing industries, commerce, banking, insurance, public administration, professions and other services, etc.

The intermediate level of occupational groups is given in Appendix 4 while the most detailed level of occupations for which information from the 2006 Census is published is given in Appendix 3.

³ Standard Occupational Classification, Second edition, HMSO, London, 1995.

Appendix 2 (contd.)

Industry

As in the 2002 Census, the 2006 Census continues to code industry using NACE – the General Industrial Classification of Economic Activities within the European Communities. NACE Rev. 1 is a 4-digit activity classification that was drawn up in 1990 and is a revision of the version originally published by Eurostat in 1970.

NACE is a hierarchical classification, with 60 2-digit codes, 222 codes at 3-digit level and 503 at 4-digit level. The most detailed level of industry distinguished in the present report is given in Appendix 7 while the intermediate level of industrial groups is given in Appendix 8.

The industry in which a person is engaged is determined (whatever the occupation) by the main economic activity carried out in the local unit in which he or she works. If, however, the local unit provides an ancillary service to another unit in the business (e.g. administration, storage, etc.) then the persons in the ancillary unit are classified to the industry of the unit it services. Thus, while the occupational classification is concerned only with the particular work performed by an individual regardless of the activity carried on at the local unit, the industrial classification is concerned only with the ultimate purpose of the unit or end product regardless of the precise nature of the work performed by each individual.

A manufacturing or commercial unit may employ persons with many different occupations for the purpose of making a particular product or for giving a particular service. Conversely, there are cases in which particular occupations are largely confined to a single industry. For example, the majority of persons with agricultural occupations are in the agriculture industry and most miners are in the mining industry.

The term *industry* used for Census of Population purposes is not confined to manufacturing industry. It is synonymous with the term “sector of economic activity”. The basis of the industrial classification is, in the case of employees, the business or profession of their employer and in the case of self-employed persons, the nature of their own business or profession.

Socio-economic Group

The entire population was classified to one of ten specific socio-economic groups (introduced in 1996). In addition a residual group entitled “All others gainfully occupied and unknown” was used where sufficient details were not provided. The classification aims to bring together persons with similar social and economic statuses on the basis of the level of skill or educational attainment required. In defining socio-economic group no attempt is made to rank groups in order of socio-economic importance.

The socio-economic group of persons aged 15 years or over who are at work is determined by their occupation and employment status. Unemployed or retired persons aged 15 years or over are classified according to their former occupation and employment status. The detailed classification used for determining the socio-economic group of all persons at work, unemployed or retired is given in Appendix 5.

Persons on home duties or at school/college, who are members of a family unit, were classified to the socio-economic group of the person in the family on whom they were deemed to be dependent. Thus, if the head of a family was at work, unemployed or retired, dependent persons were assigned to his/her socio-economic group. If the head was neither at work, unemployed nor retired (e.g. never worked, permanently disabled, etc.) or if his/her occupation was not known, they were assigned to the socio-economic group of the principal earner in the family - if there was no such earner, they were assigned to the **unknown** socio-economic group. Other persons engaged in home duties or at school/college who were not members of a family unit, such as persons living alone or relatives of a head of household who were not members of the family unit (e.g. widowed grandparents, etc.), were assigned to the **unknown** group.

Appendix 2 (contd.)

The socio-economic groups used in the census are as follows:

- A Employers and managers
- B Higher professional
- C Lower professional
- D Non-manual
- E Manual skilled
- F Semi-skilled
- G Unskilled
- H Own account workers
- I Farmers
- J Agricultural workers
- Z All others gainfully occupied and unknown

Social Class

The entire population is also classified into one of the following social class groups (introduced in 1996) which are defined on the basis of occupation:

- 1 Professional workers
- 2 Managerial and technical
- 3 Non-manual
- 4 Skilled manual
- 5 Semi-skilled
- 6 Unskilled
- 7 All others gainfully occupied and unknown

The occupations included in each of these groups have been selected in such a way as to bring together, as far as possible, people with similar levels of occupational skill. In determining social class no account is taken of the differences between individuals on the basis of other characteristics such as education. Accordingly social class ranks occupations by the level of skill required on a social class scale ranging from 1 (highest) to 7 (lowest). This scale combines occupations into six groups by occupation and employment status following procedures similar to those outlined above for the allocation of socio-economic group. A residual category "All others gainfully occupied and unknown" is used where no precise allocation is possible. The detailed classification used for determining the social class group of all persons at work, unemployed or retired is given in Appendix 6.
