

## Consumer Price Index November 2010

**CPI/HICP - all items**  
**Annual Percentage Change**

**CPI and HICP**

	CPI		HICP	
	% monthly change	% annual change	% monthly change	% annual change
Jul 2010	-	- 0.1	- 0.1	- 1.2
Aug 2010	+ 0.7	+ 0.2	+ 0.2	- 1.2
Sep 2010	- 0.1	+ 0.5	- 0.2	- 1.0
Oct 2010	-	+ 0.7	+ 0.1	- 0.8
Nov 2010	- 0.1	+ 0.6	- 0.2	- 0.8

### Prices rise by 0.6% in the year to November

Consumer Prices in November, as measured by the CPI, decreased by 0.1% in the month. This compares to no change recorded in November of last year. Prices on average, as measured by the CPI, were 0.6% higher in November compared with November 2009.

The EU Harmonised Index of Consumer Prices (HICP) decreased by 0.2% in the month, compared to a decrease of 0.1% recorded in November of last year. Prices on average, as measured by the HICP, were 0.8% lower in November compared with November 2009.

The most notable changes in the year were increases in *Housing, Water, Electricity, Gas & Other Fuels* (+9.2%), *Communications* (+2.9%) and *Miscellaneous Goods & Services* (+2.4%). There were decreases in *Clothing & Footwear* (-5.5%), *Alcoholic Beverages & Tobacco* (-3.3%) and *Education* (-3.0%).

The annual rate of inflation for Services was 2.0% in the year to November, while Goods decreased by 1.1%.

The most significant monthly price changes were decreases in *Alcoholic Beverages & Tobacco* (-1.0%), *Restaurants & Hotels* (-0.4%) and *Transport* (-0.3%). There was an increase in *Clothing & Footwear* (+1.9%).

The main factors contributing to the monthly change were as follows:

- ◆ *Alcoholic Beverages & Tobacco* fell due to lower prices for spirits and wine sold in off licences and supermarkets.
- ◆ *Restaurants & Hotels* fell mainly due to a reduction in the price of hotel and other accommodation.
- ◆ *Transport* fell mainly due to a fall in the price of second-hand cars.
- ◆ *Clothing & Footwear* increased due to a recovery in prices.

The CPI excluding tobacco index for November decreased by 0.2% in the month and was up by 0.6% in the year. The CPI excluding energy products fell by 0.2% in the month and decreased by 0.1% in the year. The CPI excluding mortgage interest decreased by 0.2% in the month and was down by 0.7% in the year.

## Background Notes – Consumer Price Index

- Definition** The Consumer Price Index is designed to measure the change in the average level of prices (inclusive of all indirect taxes) paid for consumer goods and services by all private households in the country and by foreign tourists holidaying in Ireland.
- Consumer Price Index (CPI)** Over 50,000 prices are collected for a representative basket consisting of 616 headings which cover over 1,000 different items in a fixed panel of retail and service outlets throughout the country during the week containing the second Tuesday of each month. The dates to which the November index relates are Monday 8th to Tuesday 16th November, 2010.
- Scope of the Index**
- (i) **Population Coverage:** All private households in the state and the expenditure of foreign tourists within Ireland. It does not include the expenditure of persons in institutions and other non private households. Expenditure which occurs abroad by Irish residents is also excluded. In statistical terms coverage is referred to as the domestic concept.
  - (ii) **Geographic Coverage:** Covers the whole of the Republic of Ireland. Pricing takes place in 84 locations (cities and towns) throughout the country. These sampling points are located in Dublin city and county, the four regional cities of Cork, Limerick, Galway and Waterford, approx. 80% of towns with a population of 10,000 and over, approx. 70% of towns between 5,000 and 9,999 and a smaller proportion below this threshold. The results are weighted to represent the distribution of the population and its related consumer expenditure.
  - (iii) **Item Coverage:** All goods and services bought by the reference population for the purposes of consumption are included in the index. Expenditure on capital assets and investments, gambling and certain other activities are however excluded. Over 1,000 different varieties are priced and then aggregated into 616 item headings and 12 group headings based on the COICOP classification. With each rebase the coverage of goods and services is reviewed to ensure that it continues to be representative of consumer tastes and purchasing practices.
- Price Collection** Personal visits are made to retail outlets by some 100 part-time pricers on a monthly basis. Approximately 50,000 price quotations are gathered in this way. In addition, 114 special inquiries covering items such as utility charges and services are conducted by post and telephone. Most prices are collected monthly, some quarterly and others annually. The CSO supplies general specifications to price collectors and collectors are free initially to select a brand and in certain cases, size. This allows for a wide variety of different brands of the same item to be priced throughout the country. Once selected, the same item/brand is priced on a monthly basis in order to ensure matched price quotations. If an item disappears, substitution can occur but that price is excluded until matched prices are available for the same comparable item for two consecutive months. The CSO wishes to put on record its appreciation of the co-operation and assistance it receives from retail outlets and other business concerns.
- CPI Weights** The CPI measures in index form the monthly changes in the cost of purchasing a fixed representative ‘basket’ of consumer goods and services (i.e. Laspeyres formula). The representative share of each item in this basket is proportional to the average amount purchased by all households in the country as determined by the Household Budget Survey and by foreign tourists in this country using estimates of expenditure by tourists across a range of consumer goods and services. Individual items typically purchased by foreign tourists while holidaying in Ireland such as hotel accommodation and meals out have been adjusted to take account of the additional tourist expenditure. Identical items are priced in the same outlet on each occasion so that changes in the cost of this constant basket reflect only pure price changes.

## Background Notes – Consumer Price Index (continued)

- Classification** The classification used in the CPI is based on a version of COICOP – COICOP HICP, the Classification of Individual Consumption by Purpose. This replaced the former national classification which was used up to December 2001. The COICOP classification breaks consumer expenditure into twelve different categories covering a comprehensive range of consumer goods and services.
- Methodological Details** A full methodological description of the new series is available in the CPI 2006 Introduction to Series booklet which is published on the website at [http://www.cso.ie/surveysandmethodologies/documents/pdf\\_docs/introduction\\_to\\_series\\_base\\_december\\_2006.pdf](http://www.cso.ie/surveysandmethodologies/documents/pdf_docs/introduction_to_series_base_december_2006.pdf)
- Utilities and Local Charges** Includes electricity, gas, landline telecommunications and waste collection & disposal charges.
- Rebase** The index has been rebased with effect from December 2006, the tenth series since the foundation of the State. The index was last rebased in January 2002 (Base December 2001 = 100).
- The rebase of the current CPI resulted in a number of methodological changes:
- Updating the expenditure weights;
  - A revision of the sample of goods and services;
  - An update of the sample of areas priced.
- Goods and Services** The consumer basket can be split into two constituent parts - goods and services according to the following definitions.
- Goods** Goods are defined as non service items usually purchased and transportable from a retail outlet - the basket excluding services.
- Services** Services include electricity, gas, telecommunications and other public utilities, alcoholic beverages consumed on licensed premises, meals out, accommodation services, public transport, medical fees, insurances, education fees, hairdressing & other personal services, childcare & social protection, entertainment & recreation services, mortgage interest & rents, package holidays and other miscellaneous services.
- Mortgage Interest** In line with normal practice for a fixed base price index, the current approach to measuring mortgage interest in the CPI reflects the situation in the base reference period December 2006 when the standard variable rate was dominant. Subsequently, tracker mortgages have become more popular. This did not give rise to any difficulties while the standard variable and tracker mortgage interest rates moved broadly in line with one another, which would be the normal expectation. However, the decoupling that has taken place since August 2009 has resulted in dramatically different trends emerging. For example, between September 2009 and September 2010 the standard variable rate increased from 2.93% to 3.66% whereas the tracker rate did not change. The Mortgage Interest component of the CPI, which is largely determined by the trend in the standard variable rate, increased by 25.1% as a result and contributed +1.25% to the overall change in the All Items index. It is crudely estimated that the latter impact would have been reduced by between 0.2% and 0.5% had the Mortgage Interest component been calculated on a current weighting basis. Users should take this “weighting effect” into account in interpreting the mortgage interest related movements in the index.

## Background Notes – Harmonised Index of Consumer Prices

- Introduction** The EU-Harmonised Index of Consumer Prices is calculated in each Member State of the European Union. The purpose of this index is to allow the comparison of consumer price trends in the different Member States.
- Comparison with CPI** The methodology now adopted for the construction of the national CPI is identical to that recommended for the HICP. Thus the two indexes only differ in respect of the coverage of certain goods and services and the definition of insurance. The current EU reference base period (Year 2005 = 100) is however retained for ease of comparison with other EU countries.
- Excluded Items** The following items, constituting approximately 9.5% of the Irish CPI expenditure weighting, are excluded from the HICP:
- ◆ mortgage interest
  - ◆ building materials
  - ◆ concrete blocks
  - ◆ union subscriptions
  - ◆ motor car insurance (non-service)
  - ◆ dwelling insurance (non-service)
  - ◆ motor car tax
  - ◆ motor cycle tax
- Weights** The expenditure weighting system used in the HICP is the same as that used for the CPI excluding the items listed above. In addition the weights of House Insurance (Buildings) and Health Insurance differ because of definition. Taking all these factors into account the HICP expenditure covers just under 90% of total CPI expenditure.
- Monetary Union Index of Consumer Prices (MUICP)** Euro area inflation is measured by the MUICP ('Monetary Union Index of Consumer Prices' as defined in Council Regulation (EC) No 2494/95 of 23 October 1995) which is the official euro area aggregate. The MUICP is calculated as a weighted average of HICPs of the 16 countries in the euro area. Country weights are computed every year reflecting the country's share of the household final monetary consumption expenditure in the euro area total.
- Classification System** The coverage of the indices is based on the international classification system, COICOP (classification of individual consumption by purpose).

## Background Notes – COICOP Classification

CPI and the HICP both use the COICOP/HICP classification (Classification of Individual Consumption by Purpose - adapted for the purposes of the EU HICP).

The COICOP classification is based on 12 main subgroups.

<b>01 Food and Non Alcoholic Beverages</b>	Food and non alcoholic beverages purchased in supermarkets, small shops, speciality shops and petrol station forecourt outlets. It excludes meals out which are covered under 11 Restaurants and Hotels.
<b>02 Alcoholic Beverages and Tobacco</b>	Includes alcoholic beverages purchased in off licences and supermarkets but excludes alcohol consumed on or within a licensed premises which is classified under 11 Restaurants and Hotels.
<b>03 Clothing and Footwear</b>	Mens, ladies and childrens clothing and footwear, sports and leisurewear and services such as laundry and dry cleaning, shoe repair, dress hire and alteration.
<b>04 Housing, Water, Electricity, Gas and Other Fuels</b>	This group covers rents, mortgage interest repayments, waste collection and disposal charges, goods and services for maintaining, decorating and repairing dwellings and domestic energy products such as electricity, gas and solid fuels.
<b>05 Furnishings, Household Equipment and Routine Household Maintenance</b>	This category covers household items such as furniture, carpets and other floor coverings, house textiles and soft furnishings, household electrical appliances, and other household items such as utensils, tools, garden equipment and non-durable items for cleaning, washing and other day to day household activity. Also included in this category are domestic services such as cleaning and other services.
<b>06 Health</b>	Health includes medical products, appliances and equipment, hospital charges and out patient services supplied by doctors, dentists, opticians and practitioners of alternative and complimentary medicine.
<b>07 Transport</b>	Includes the purchase of new and second hand vehicles, spare parts, car maintenance, fuels and lubricants, public transport and services such as parking, motor association subscriptions, car wash, toll charges, driving tests, licences and car hire.
<b>08 Communications</b>	Post and telecommunications.
<b>09 Recreation and Culture</b>	All goods and services connected with recreation and culture and includes items such as audio visual and photographic equipment, computers, music and DVDs, sports and recreation goods, games and toys, items connected with gardening and pets, recreational, sporting and cultural activities and events, newspapers and other reading material, package holidays and other items connected with recreation and culture.
<b>10 Education</b>	Covers all aspects of education including primary, secondary, third level and other education and training such as night courses, play schools and examination fees.
<b>11 Restaurants and Hotels</b>	This category covers the following areas: meals in restaurants and hotels; fast food and takeaways; cafes; canteens; alcohol consumed on or within a licensed premises and accommodation services supplied by hotels, guesthouses and hostels.
<b>12 Miscellaneous Goods and Services</b>	This remaining category covers a wide range of items including hairdressing and other grooming; goods for hygiene, hair and body care; personal goods such as jewellery, handbags and wallets; childcare and other social protection services; insurance, financial services and other services including funerals, weddings, legal and professional services.

## Background Notes – Calculation of Percentage Changes and Contributions

### Calculating percentage changes in the index

The movement of the CPI, HICP and their subindices are expressed as percentage changes, rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period, whereas percentage changes are not. The example below illustrates the computation of index point and percentage changes.

Index point change	
CPI	106.7
Less previous index	103.7
Equals index point change	3.0
Percentage change	
Index point difference	3.0
Divided by the previous index	103.7
Equals	0.0289
Results multiplied by 100	0.0289 x 100
Equals percentage change	2.9

### Estimating Contributions

A contribution represents the amount of the overall percentage change in the all items index which is accounted for by any given category. It can be estimated for any category in the CPI (e.g. the twelve COICOP 2 digit groups) and for any period of time.

### Data Required:

1. Base Weight for the category for which you wish to estimate the contribution.
2. Current Index for the category in question with base December 01=100.
3. Percentage change for the category in question for the period for which you wish to estimate a contribution.
4. All Items Consumer Price Index for the previous period in question (i.e. the start period).

### Example:

To estimate the contribution of Food & Non-Alcoholic Beverages (COICOP 01) to the overall annual percentage change in the CPI up to July 2006 you would need the following data

- |   |         |
|---|---------|
| 1. Base weight for COICOP 01 (base December 2001):                          | 14.092% |
| 2. Current Index (i.e. July 2006) for COICOP 01:                            | 103.7   |
| 3. Previous Index (i.e. July 2005) for COICOP 01:                           | 102.1   |
| 4. All Items Consumer Price Index for the previous period (i.e. July 2005): | 111.3   |

### Steps in the calculation

<b>Step 1: Multiply the base weight by the current index:</b>	14.092 x 103.7
Equals (1)	1461.3404
<b>Step 2: Multiply the base weight by the previous index:</b>	14.092 x 102.1
Equals (2)	1438.7932
<b>Step 3: Subtract figure (2) from figure (1)</b>	1461.3404 - 1438.7932
Equals (3)	22.5472
<b>Step 4: Divide figure (3) by the previous All Items CPI</b>	/ 111.3
<b>Equals Contribution</b>	<b>0.20</b>

Therefore your estimated contribution of Food & Non-Alcoholic Beverages to the percentage change in the CPI for the year to July 2006 is 0.20. The actual published figure was 0.19. The difference is due to the fact that actual published contributions are calculated using data to more decimal places.

The first and second releases for the two periods involved will contain sufficient information to allow contributions to be estimated for a large number of CPI and HICP categories. It is more complicated to estimate contributions where more than one base period is involved, as the base weights will have changed (e.g. to estimate a contribution for the period January 2000 to January 2005 involves the November 1996=100 base and the December 2001=100 base). For assistance in this regard please contact the CPI section.

## Background Notes – Data Dissemination on www.cso.ie

The CSO website ([www.cso.ie](http://www.cso.ie)) now holds a range of CPI data. Within the Consumer Prices section of the website (accessed via the 'Prices' link on the homepage), a range of principle statistics are held including overall annual percentage changes from 1977 to date, All Items CPI annual figures from 1996 to date and COICOP group monthly and annual figures from 2002 to date.

Further data can be accessed at [www.cso.ie](http://www.cso.ie) by clicking on 'Database Direct' and 'CSO Main Data Dissemination Service'. The subject area is 'Economy', 'Prices', 'Consumer Prices' and 'Consumer Prices - Annual Series' or 'Consumer Prices - Monthly Series'. The website is updated each month at 11am on the CPI publication day.

The Database Direct for the CPI contains monthly and annual index numbers and percentage changes for the following categories and time periods:

Category	Period
All Items CPI	1975 to date
12 Main COICOP Subgroups	1975 to date
Special CPI Subindices (e.g. CPI Excluding Tobacco, Energy Products etc)	1975 to date
Harmonised Index of Consumer Prices (HICP)	1997 to date

In addition, the following data can also be accessed within Database Direct.

- Monthly index numbers and annual percentage changes for the Constant Tax Price Index from January 1997 to December 2006.
- National average prices for selected CPI goods and services from January 1997 to date.
- All Items CPI index numbers for various base periods from 1922 to date.
- Detailed sub-indices now available from 2003 to date.

*Any queries relating to the usage of the web dissemination database for CPI data should be directed to*
