

Developing a health system performance assessment framework in Ireland

Framework overview

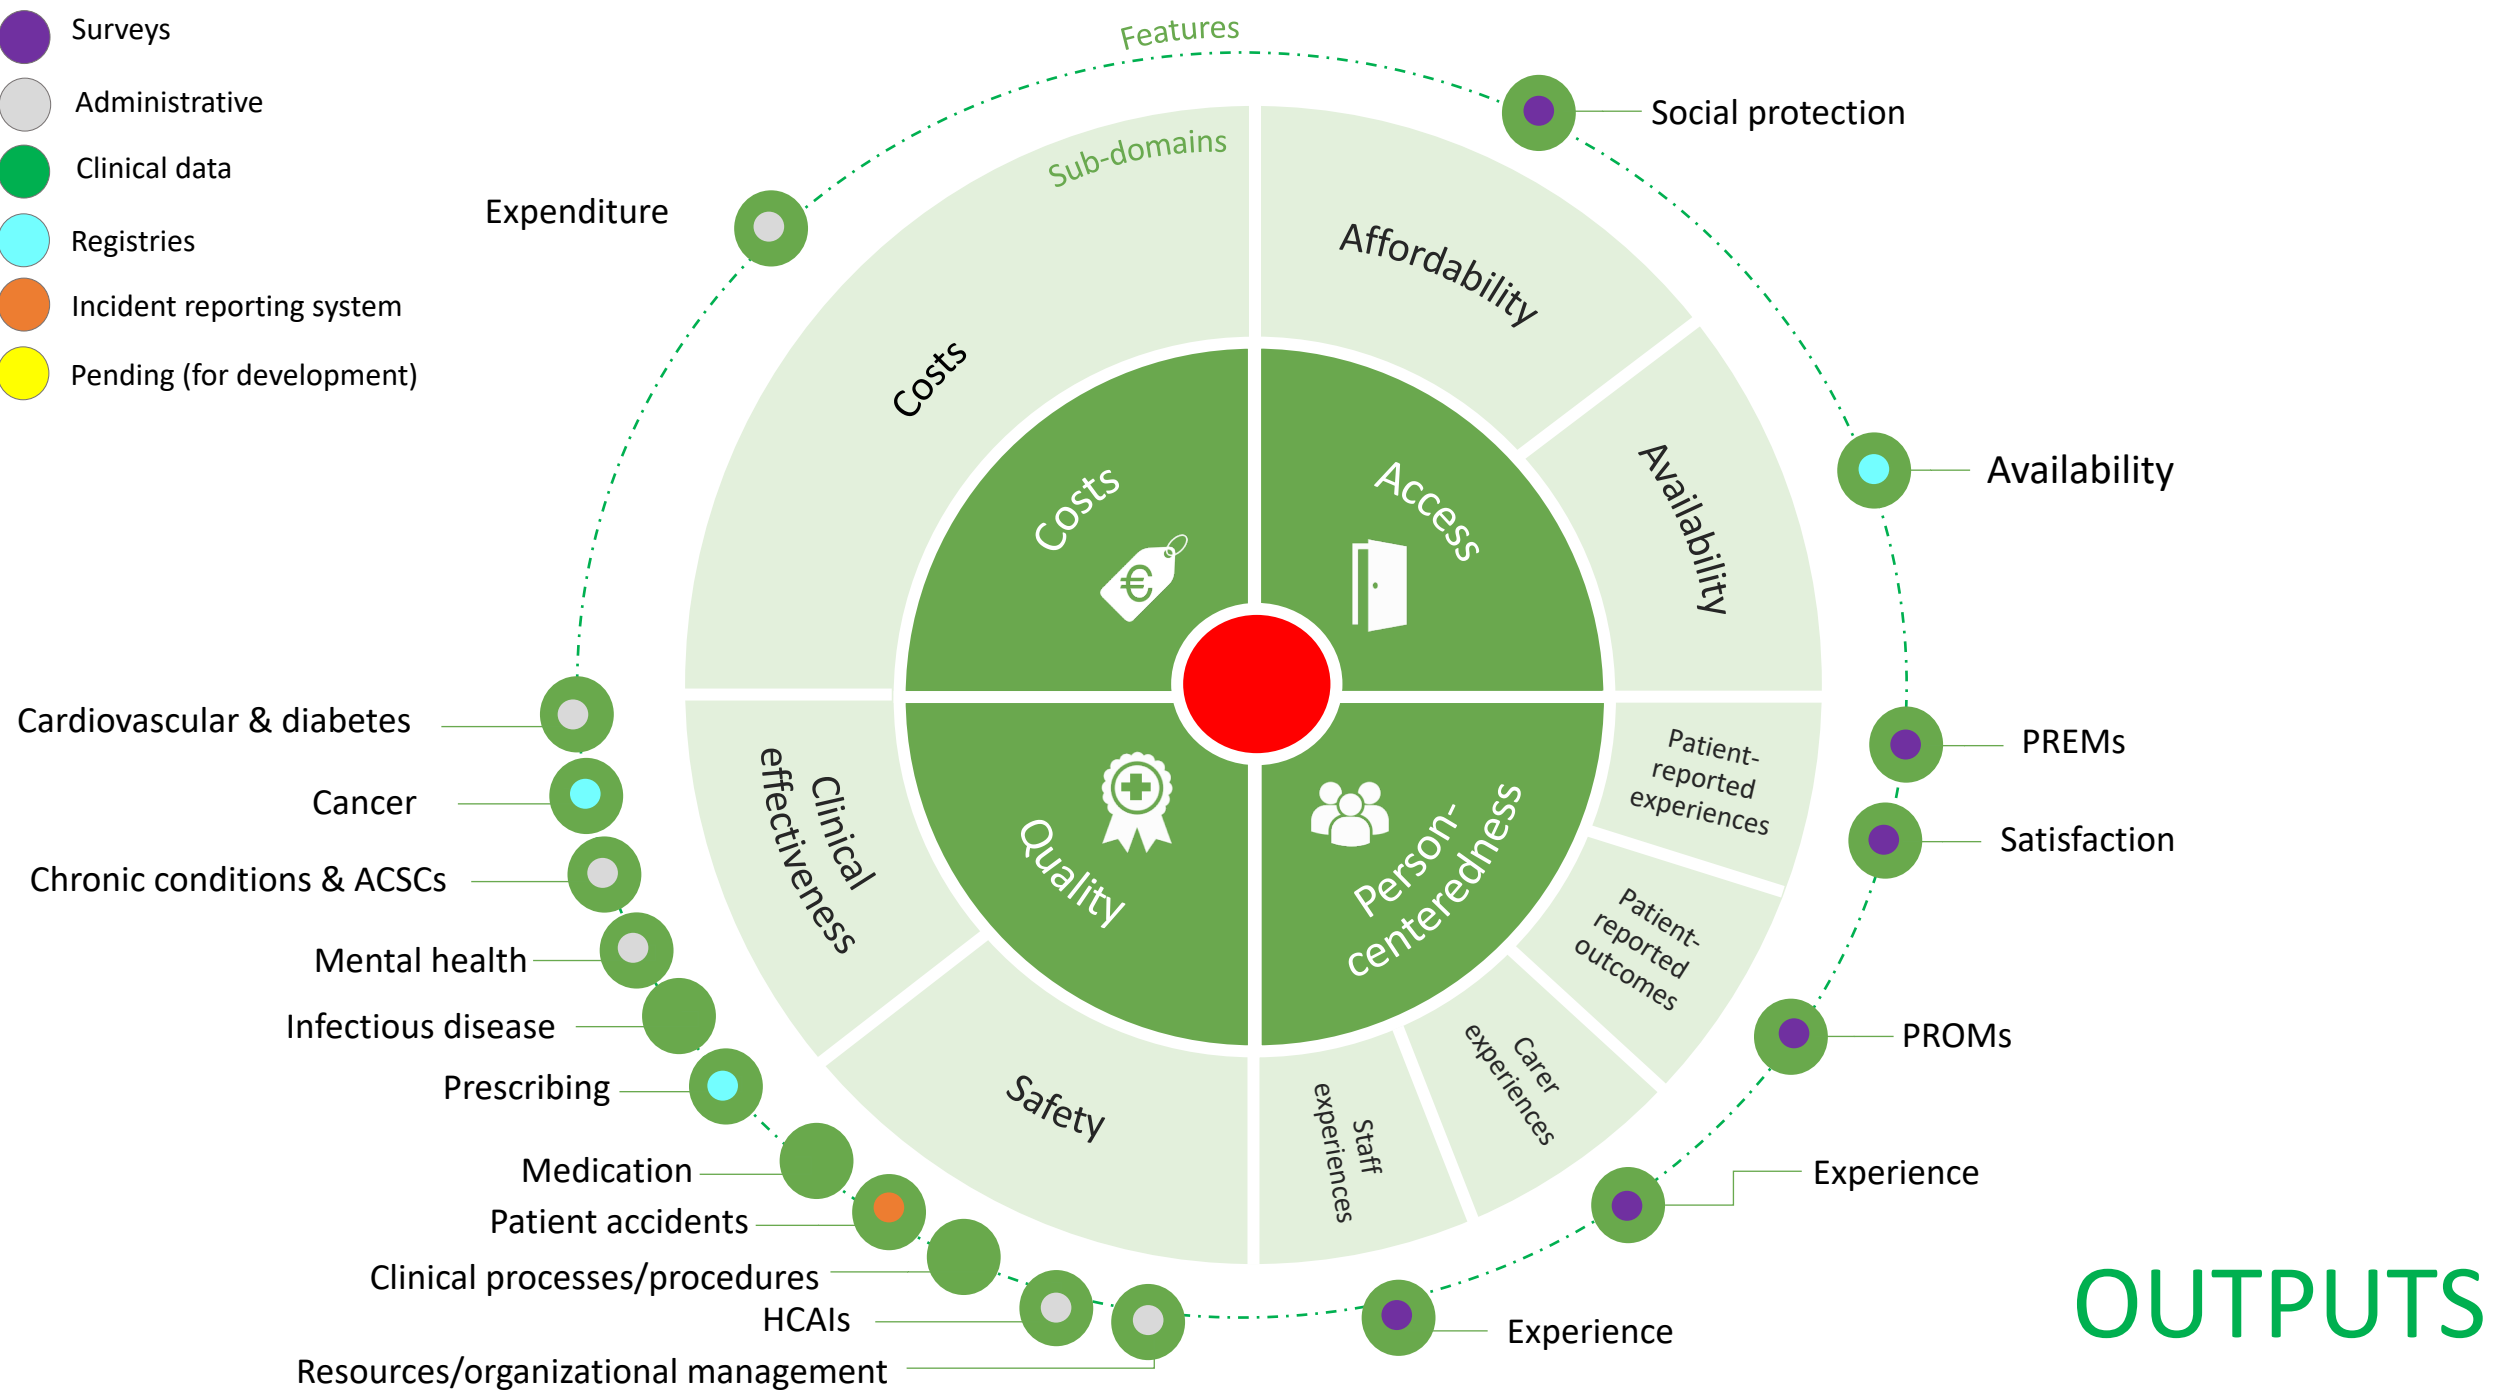

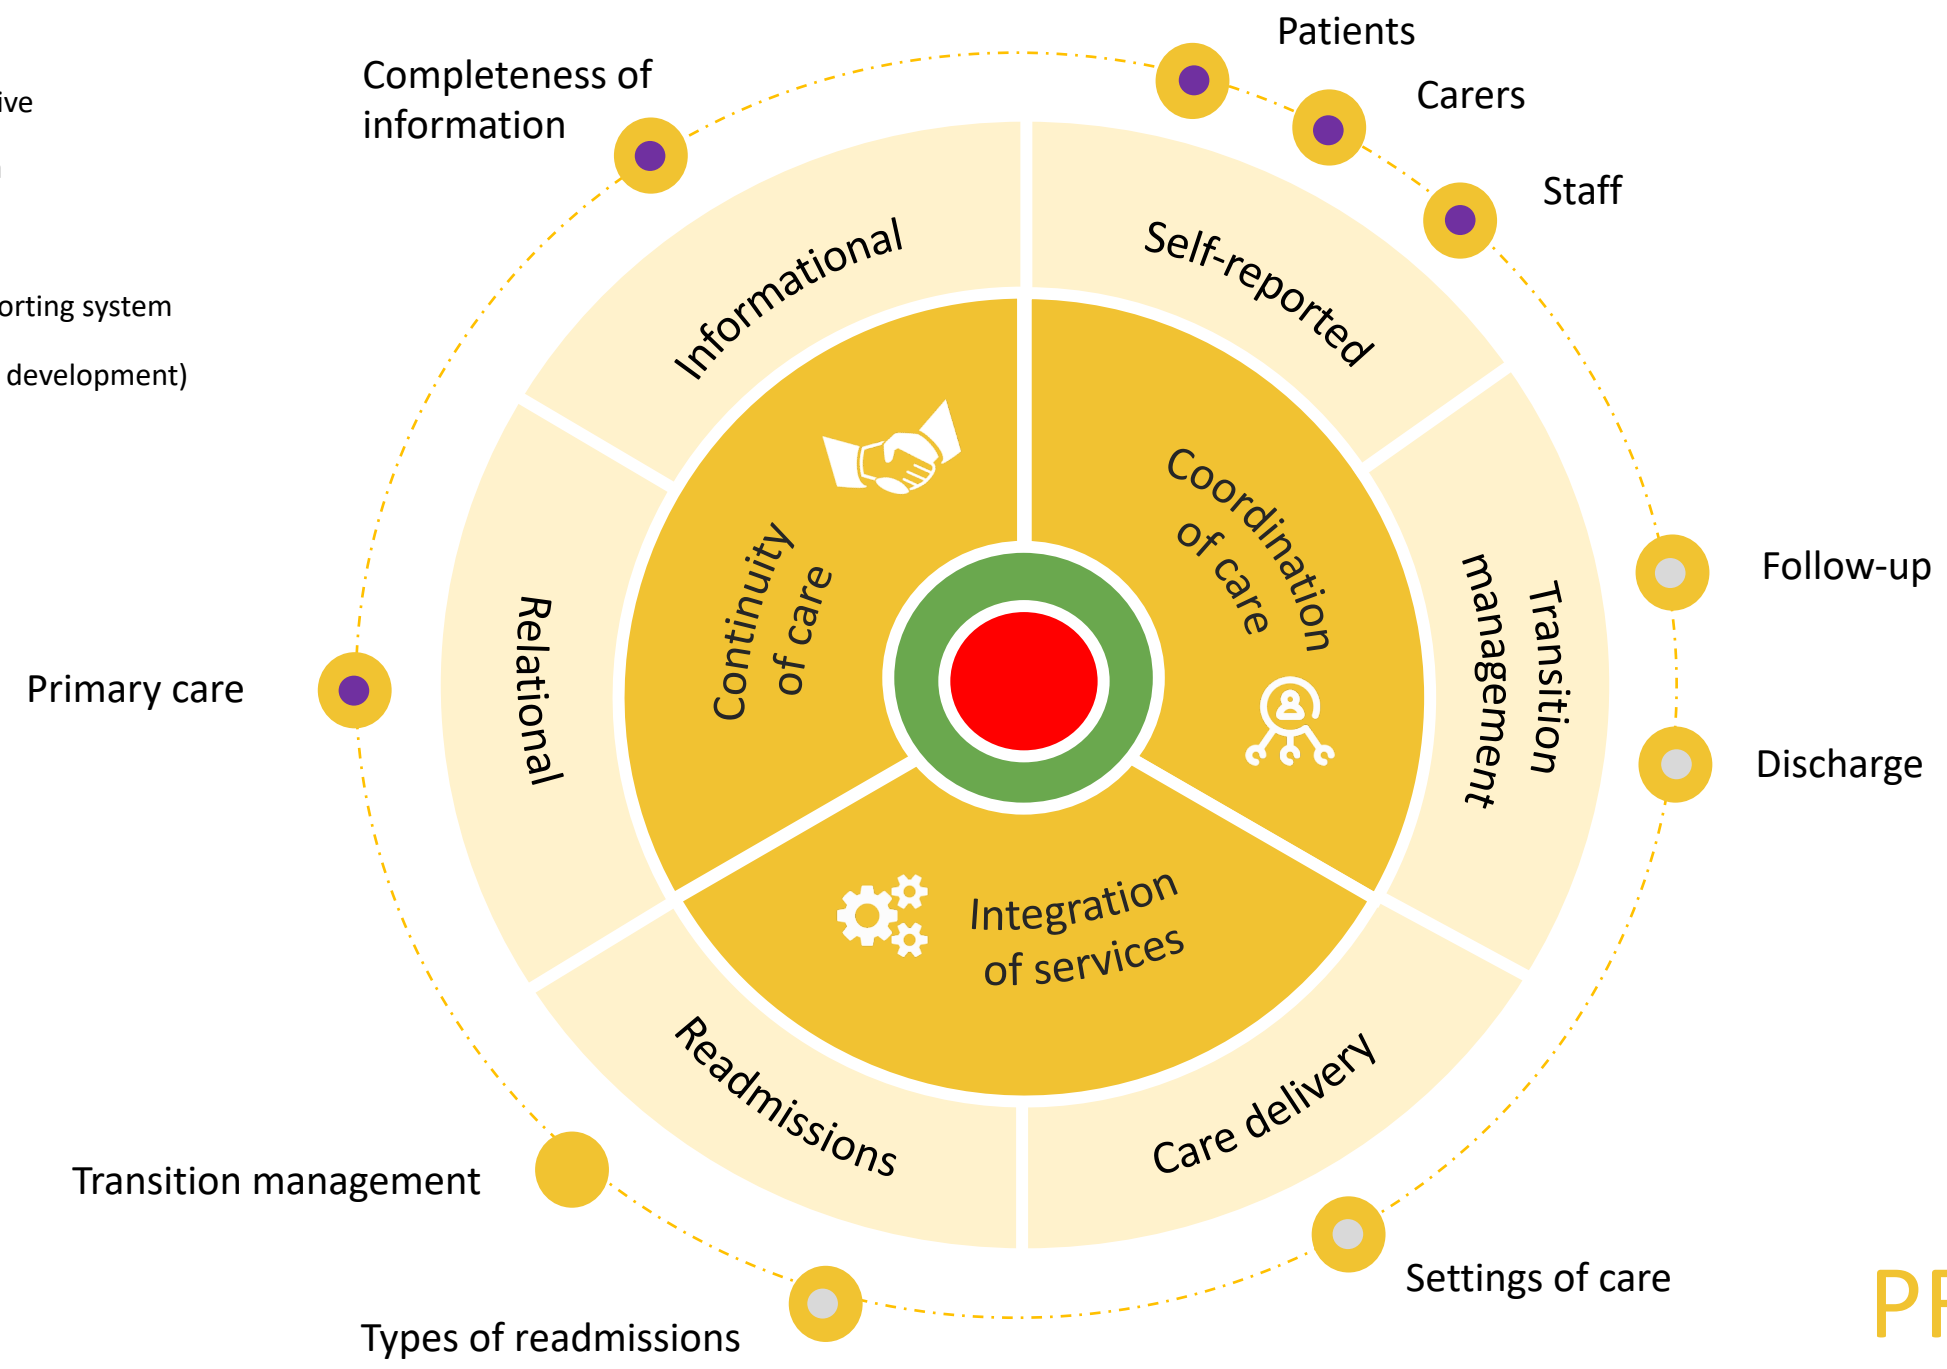

- Surveys
- Administrative
- Clinical data
- Registries
- Incident reporting system
- Pending (for development)

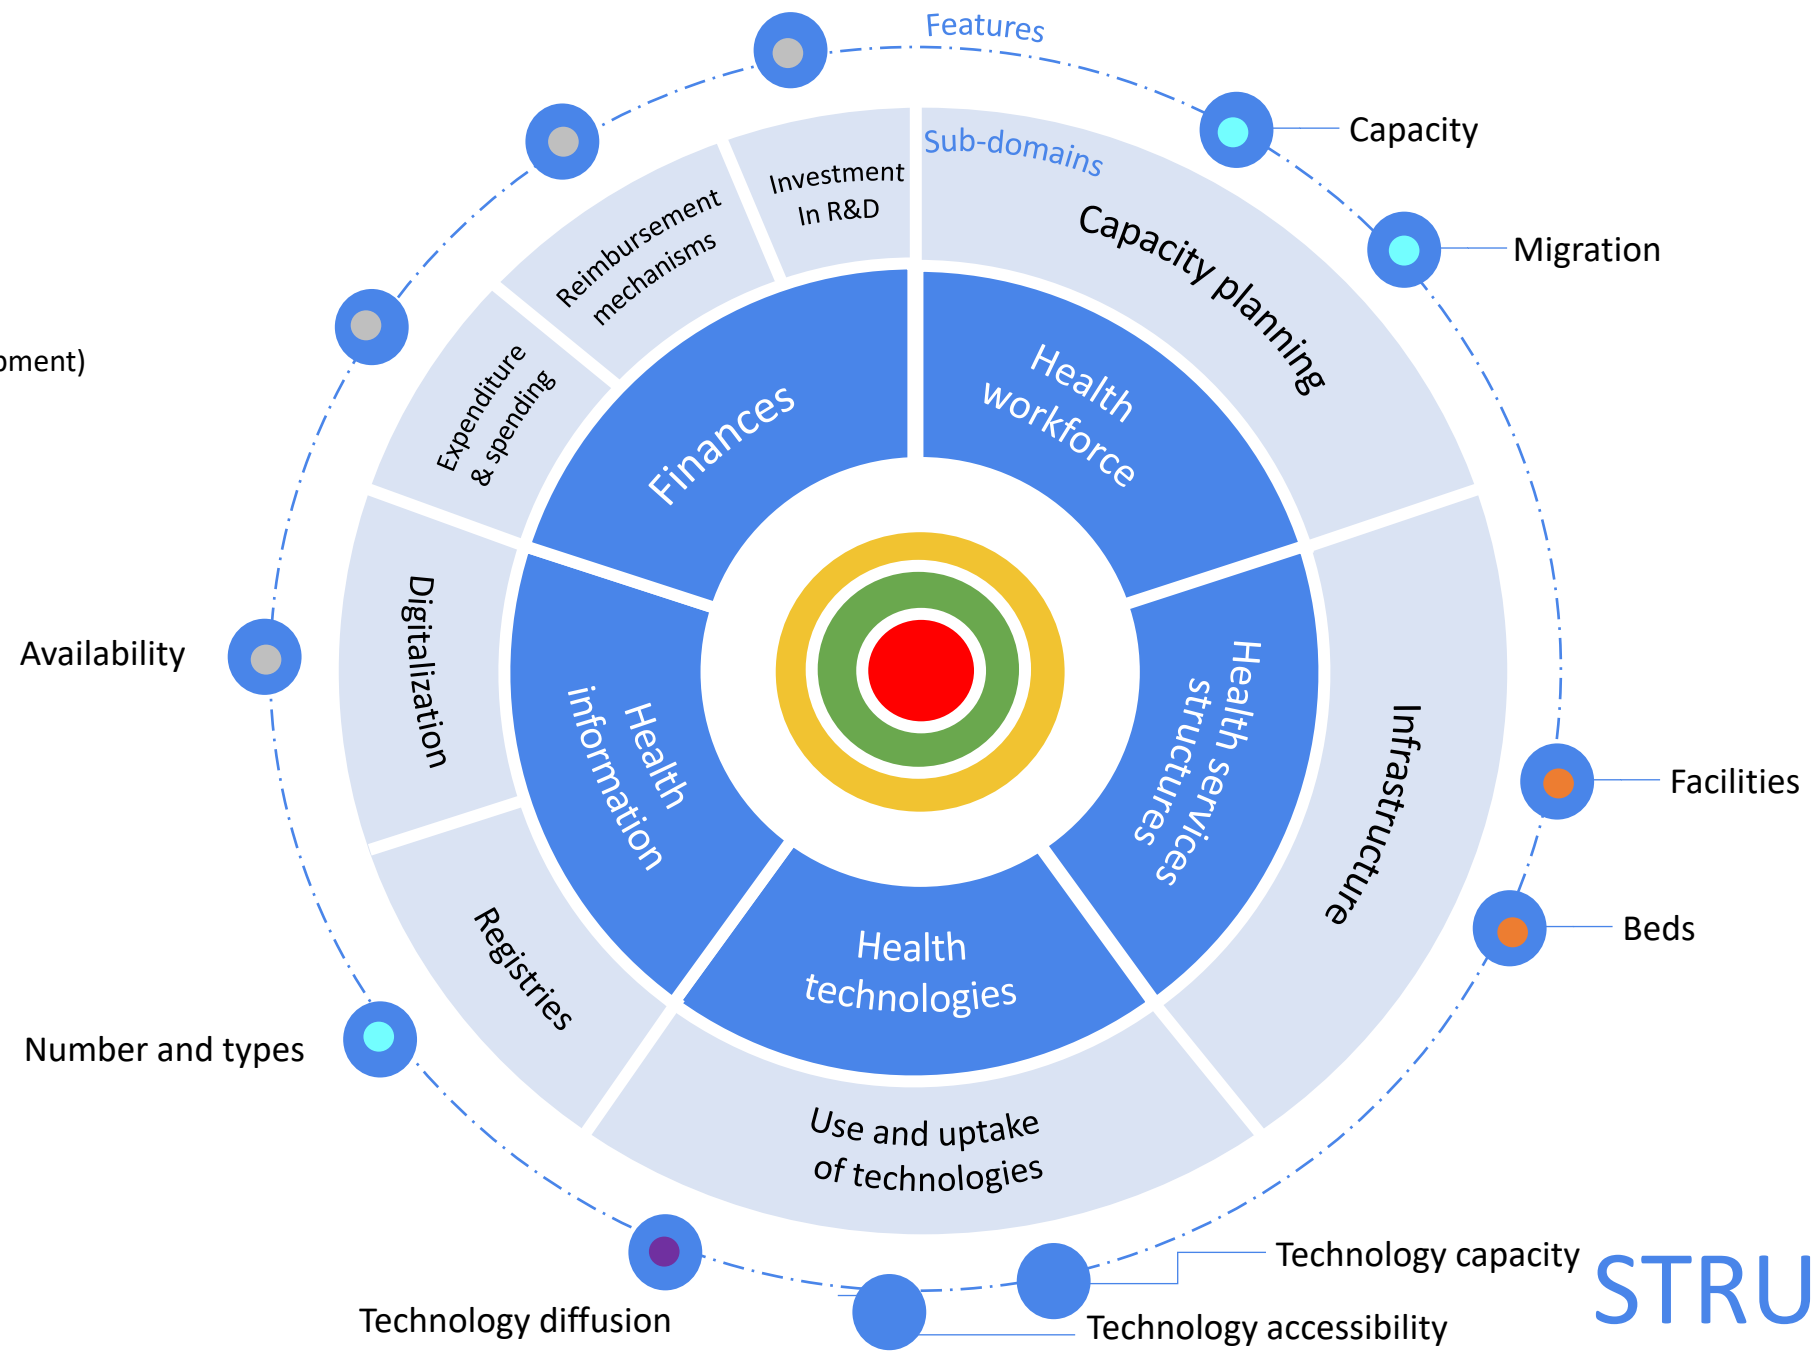

OUTPUTS

- Surveys
- Administrative
- Clinical data
- Registries
- Incident reporting system
- Pending (for development)

PROCESS

- Surveys
- Administrative
- Clinical data
- Registries
- Hospital systems
- Pending (for development)

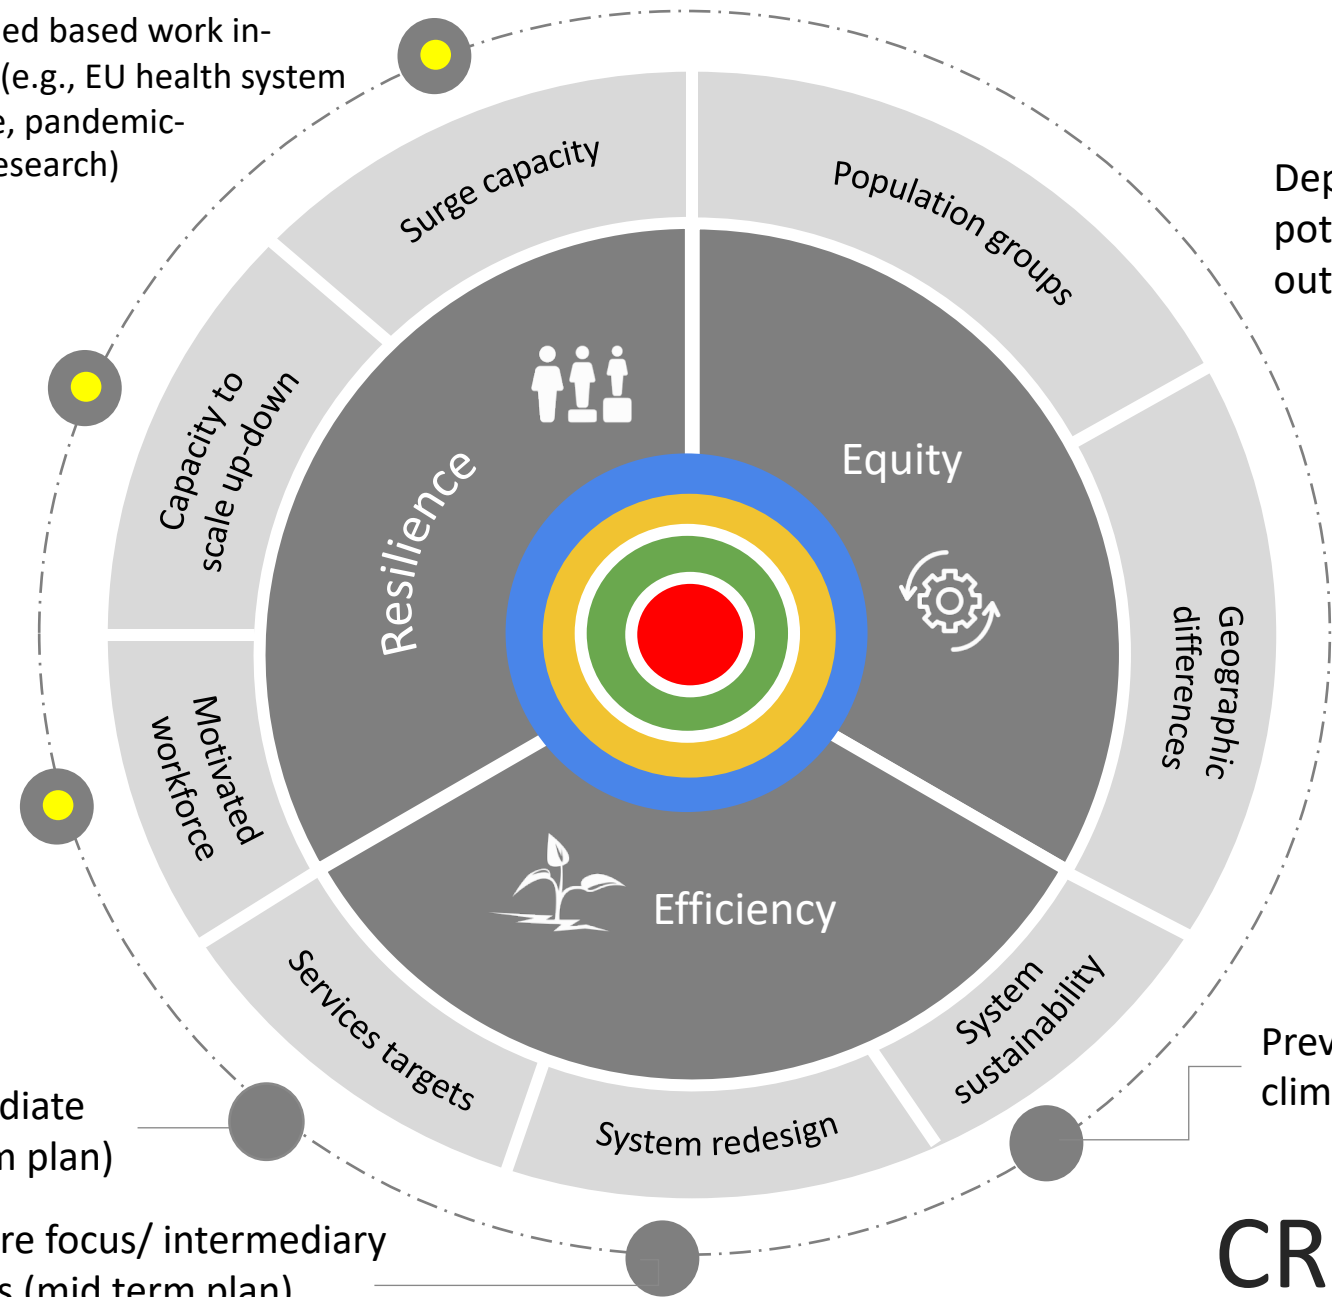

STRUCTURES

- Surveys
- Administrative
- Clinical data
- Registries
- Incident reporting system
- Pending (for development)

Specific features to be determined based work in-progress (e.g., EU health system resilience, pandemic-related research)

Dependent on disaggregation potential of indicators related to outcomes and outputs

Waiting times/immediate efficiency (short term plan)

Community care focus/ intermediary efficiency gains (mid term plan)

Prevention-focused/ climate change (longer-term)

CROSS-CUTTING

Overview of current framework

Clusters	Outcomes	Outputs	Process	Structures	Cross-cutting	Totals*
Domain	1	4	3	5	3	16
Sub-domain	5	9	6	8	8	36
Approx. features	13	19	5	6	6	49
Approx. indicators	35	95	30	70	30	260

*Note totals are for all three purposes (uses) of the framework
