Index	137

Preface

This is the fifth edition of the Directory published as a resource for health care professionals and others when looking for resource information or when making referrals to alcohol and drug services.

This expanded publication illustrates ongoing development within service provision. Further relevant information is available from Health Service Executive Health Promotion Departments on page 135.

Since the last edition, the Eastern Area has become the Eastern Region Health Authority with three separate Areas. The Directory reflects this change, as well as other changes in the nature/structure of services implemented since the last issue. This Directory is laid out alphabetically in terms of county .

Statutory services are listed before non-statutory in each county.

Overview of Drug/Alcohol/Related Services

Each Health Service Executive (HSE) Area has its own range of alcohol and drug services catering for different needs. These services include medical and nursing residential and/or nonresidential treatment services for adults, adolescents and children, including rehabilitation and after care. HSE Areas also offer a range of mental health and psychiatric services, community and outreach services, family support, counselling, referral, information and education. Many services, including a Drug Task Force network at local and regional level, continue to expand.

Drug Task Forces

Local Drug Task Forces (LDTFs) were set up in 1997 in 14 areas in Dublin experiencing the highest levels of illicit drug use, particularly heroin. These LDTFs bring together organisations in the statutory and voluntary sectors to work with local community and public representatives in developing local, targeted responses to illicit drug use.

The success of the LDTFs has prompted the Government to extend the Task Force model to other parts of the country. Regional Drugs Task Forces (RDTFs) operate from a wider geographic base than the LDTFs, serving diverse communities from urban and rural backgrounds. The ultimate aim is that each Task Force will provide a profile of all existing or planned services and resources dealing with drug misuse in their areas and coordinates area-appropriate services.

This is an expanding service. For more information about new/incoming services in your region contact the National Drugs Strategy Team, 4-5 Harcourt Road, Dublin 2, telephone 01-4754120.

Needle Exchange Services

Needle exchange is provided free of charge to over 18s who are confirmed drugs users. In certain circumstances, a service is available to 16-18 year olds. It provides a network of facilities to ensure access for all drug misusers to sterile injecting equipment as part of addiction health promoting services. This is an expanding service with more clinics coming on stream. For further information contact Area Addiction Headquarters.

Satellite Clinics

Satellite clinics are smaller treatment facilities established within local areas for local drug misusers. Treatments services are provided by general practitioners who have been trained in drug misuse. Clients have access to urine screening and counselling on site in addition to some support from treatment clinics. For referral to Satellite clinic services, contact Senior Addiction Counsellor in appropriate Community Care Area.

Glossary

Aftercare - ongoing support programme

Antabuse - alcohol-deterrent drug (disulfiram)

Behavioural treatment - therapy using reinforcement to encourage behaviour change

Bibliotherapy - client reading assignment to help client/therapist identify relevant issues

Detoxification - supervised withdrawal from acute alcoholic state

Employee Assistance Programme - confidential service to employers/staff to explore problem issues, including drug/alcohol misuse

HIV - Human Immunosuppressant virus which can lead to AIDS

Methadone - Opiate administered as heroin substitute during gradual addiction withdrawal

Minnesota Model - Therapeutic system defining alcohol dependency in terms of defense mechanisms needing to be confronted. Sees total abstinence as only goal.

Person-centred - therapy which places the client at its heart

Polydrug use - addictive use of more than one drug

Rational emotive therapy - works on premise that emotional consequences stem from client beliefs about an event rather than the event itself

Reality therapy - Aims for win-win by assisting clients to learn behaviour that meets their needs while not preventing others from meeting theirs.

Systems Principle - Therapy which focuses both on client responsibility and crucial role of close, relevant relationships in examining addiction/other problems

Therapeutic community model - residential setting fostering mutual care and responsibility without drugs/alcohol

12 Step programme - set of objectives used by Alcoholics Anonymous and adapted by other groups to help overcome dependency
