The Impact Measurement Tool (IMT) is a data collection system used to assess the effectiveness of tier one and tier two drug & alcohol services commissioned by the Public Health Agency (PHA). It is a live data collection system and this report reflects the 2021/22 position at the end of September 2022. It covers services across Northern Ireland and all services that submitted a return during 2021/22 have been included.

Table of Contents

Introduction	Page 3
Adult Treatment	Page 4
Youth Treatment	Page 7
Parental Substance Misuse	Page 10
Low Threshold Services	Page 13
Workforce Development	Page 16
Targeted Prevention	Page 17
Youth Engagement Services	Page 21

Impact Measurement Tool- Overview of Results

The Impact Measurement tool (IMT) is a data collection system used to assess the effectiveness of tier one and tier two services commissioned by the Public Health Agency (PHA) and is split into the following typologies:

- Adult Treatment (step 2);
- Young Persons Treatment;
- Low Threshold Services;
- Parental Substance Misuse;
- Workforce Development;
- Targeted Prevention;
- Youth engagement services.

The main purpose of this report is to inform decision makers within Department of Health and Public Health Agency about the impact Alcohol and Drug projects had on clients and their families in Northern Ireland in 2021/22.

Information is collected before, during and after intervention and is used to measure the impact of the service upon several different aspects of lifestyle and behaviour, referred to as domains.

Data collection & Methodology

Results for all clients discharged between 1st April 2021 and the 31st March 2022 are included in this report. This includes automatic closure for any client whose record was not closed 6 months (182 days) after the date of their initial assessment. IMT returns represent a live system which is updated quarterly by services; the figures included in this release reflect the 2021/22 position at the end of September 2022. It should be noted that the impact on services due to Covid-19 may have resulted in fewer clients being seen, which would mean fewer measurable impacts than would ordinarily have been recorded. Any client recorded multiple times in the same financial year, using the same client reference and initial assessment date is reported only once. Matched client records included in the previous annual publication, whose updated details meant they would otherwise be eligible for this publication have also been excluded to avoid duplication.

Measuring Impact

In order for the impact of treatment to be measurable, a client record must contain at least two assessments. There are a number of scenarios where it would be expected that a client be discharged without having a subsequent review, for example, an unplanned discharge where a client disengages with service; or if a client is given an immediate referral to a more appropriate service. In these instances then impacts cannot be measured.

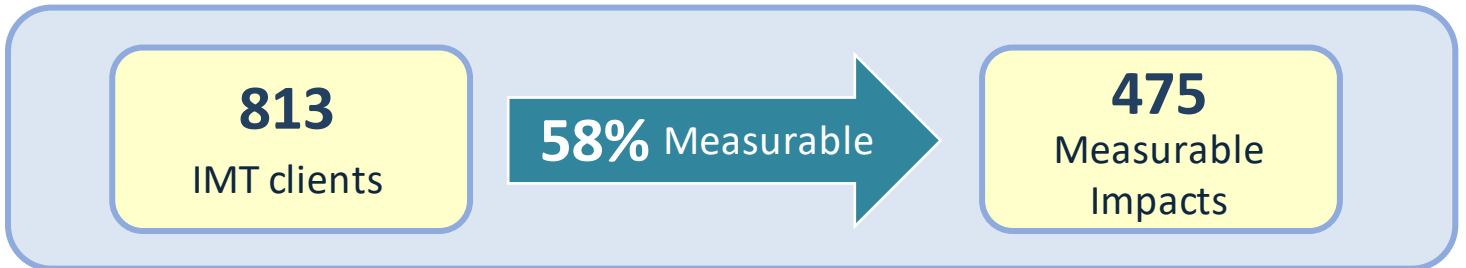

Please note that due to the nature of some of the services, not all clients will engage for a duration or level suitable for inclusion on the IMT. For this reason the impact data captured in this report should not be taken as a comprehensive record of the number of clients seen or treated within each service, but as a subset representing those who were suitable for impact measurement.

Adult Treatment

The Adult Treatment typology collects data relating to individuals aged 18 and over, who are receiving step 2 treatment or aftercare for alcohol and / or drug misuse.

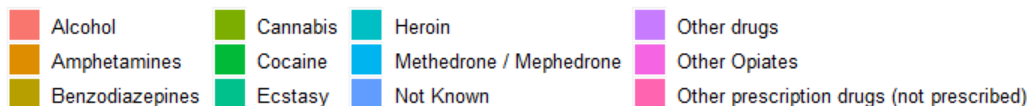

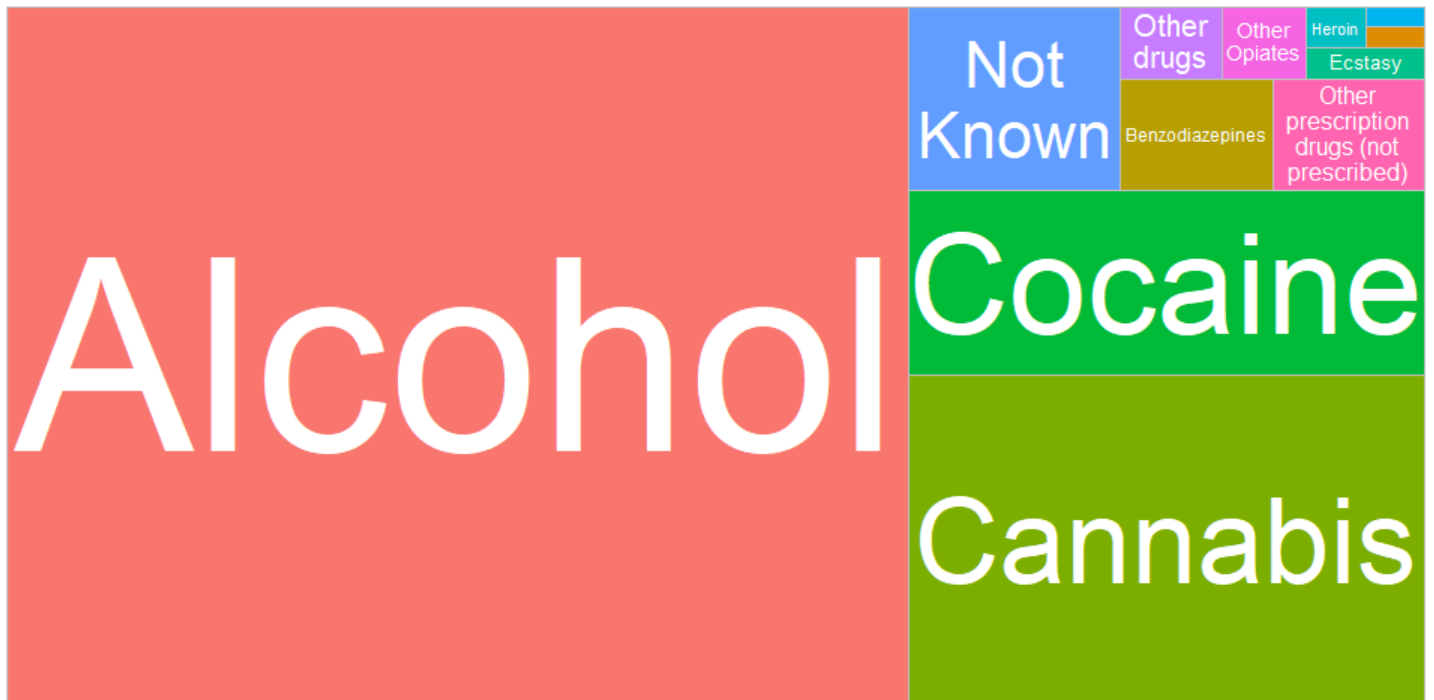

Client Overview

During 2021/22 the number of IMT clients whose treatment ended, or were otherwise discharged, was **813**; of these a total number of **475 (58%)** clients had measurable impacts.

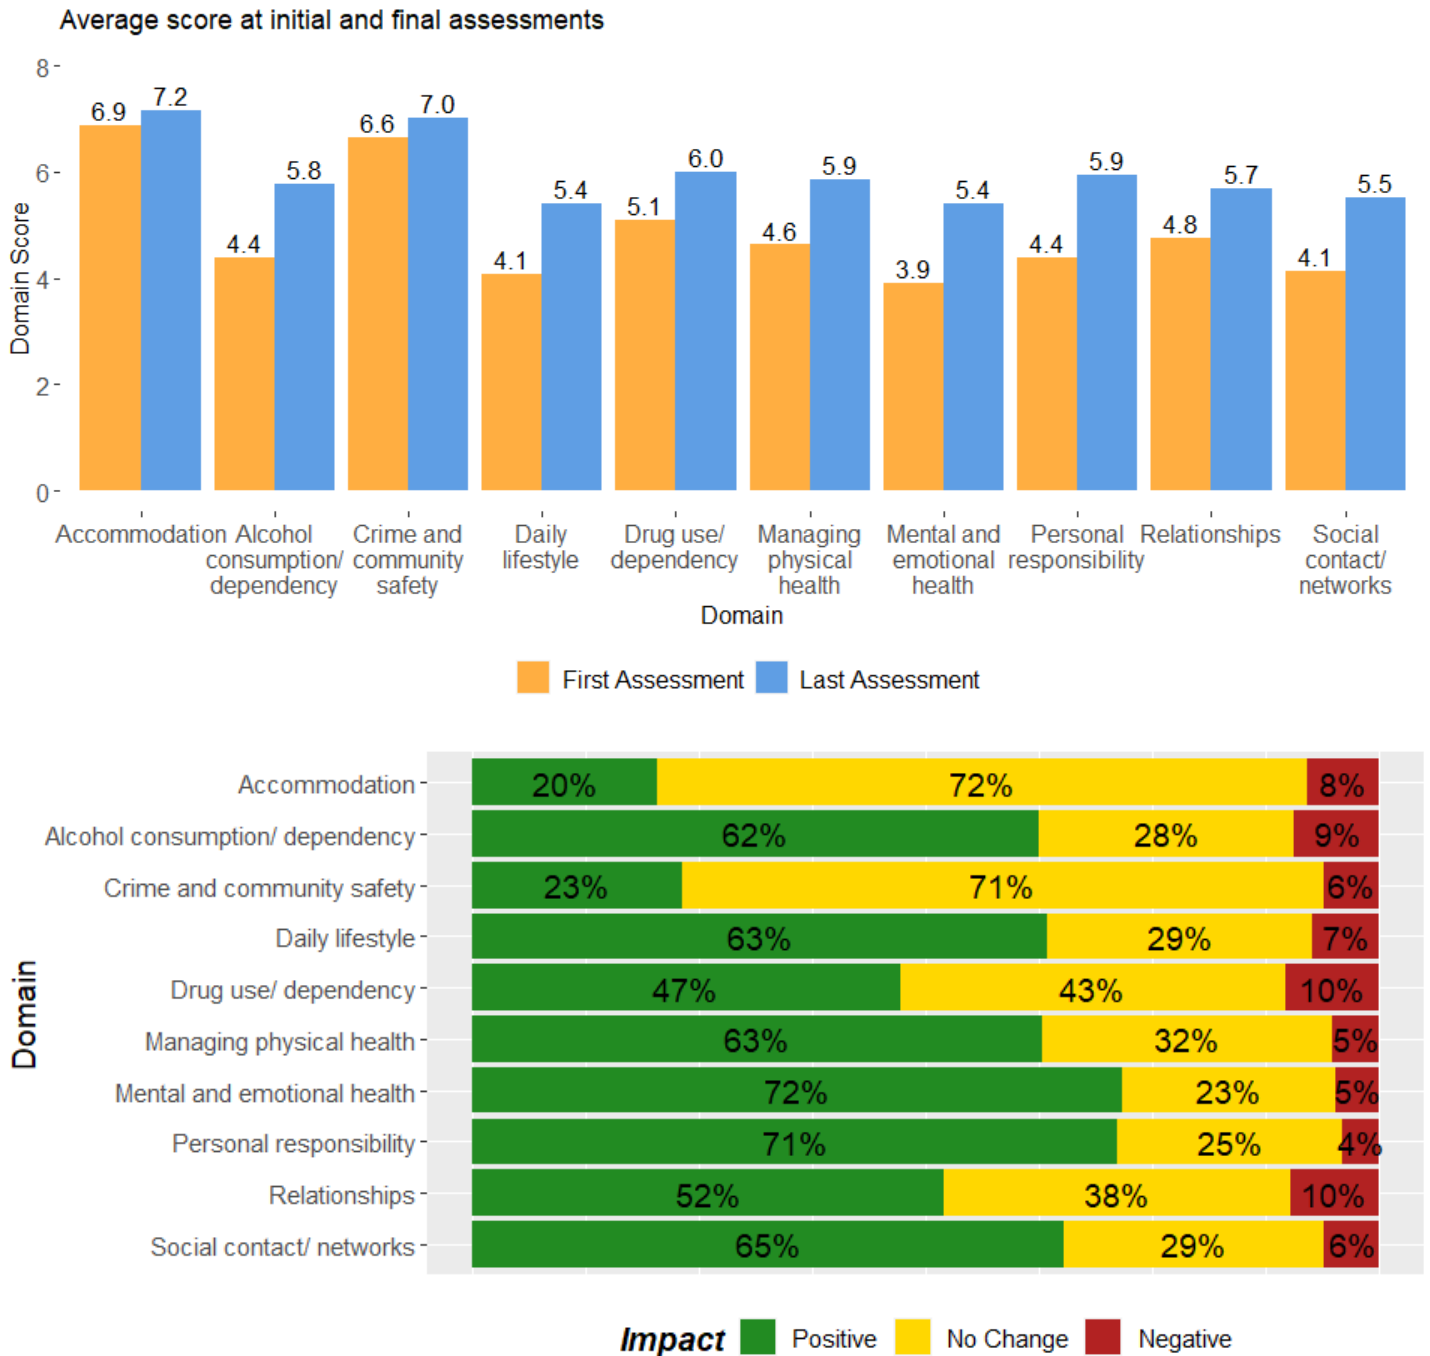

Main Substance Used

Total number of clients on IMT = 813

Impact by Domain

The table on the next page outlines the number of individuals that this data represents.

Note- The high proportion of clients seeing no change in both the Crime and Accommodation domains can be attributed in part to their first assessment being at the top of the scale (i.e. no criminal activity or satisfactory accommodation), thus no improvement could be made.

Adult treatment Domains

The following Adult (step 2) domains are measured, each receiving a score of 1 to 8; with 1 indicating highest risk or harm and 8 being lowest risk. The number of impact scores available is indicated by the base number of clients against each Domain.

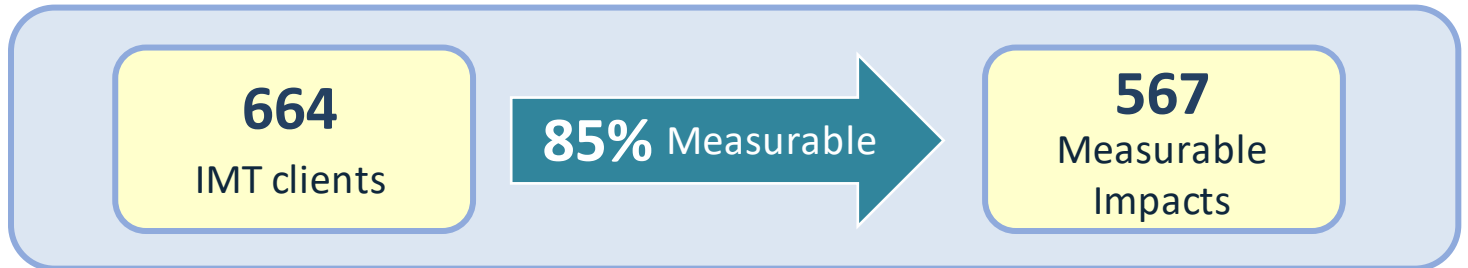

Domain	Base No. Clients	Domain Score - 1	Domain Score - 8
Accommodation	465	Homeless	Accommodation is satisfactory and all bills are being paid
Alcohol consumption/ dependency	386	Drinking at harmful levels	Effectively using strategies to avoid relapse
Crime and community safety	424	In contact with police and / or courts and / or known to have offended in the past fortnight	No criminal activity or not offending for at least one year
Daily lifestyle	468	Drug / drinking lifestyle chaotic	Involved in worthwhile daily activities and reasonably satisfied with their situation
Drug use/ dependency	282	Drug use at harmful levels	Effectively using strategies to avoid relapse
Managing physical health	468	Drug using / drinking at dangerous levels and exposed to high-risk situations	Health improved over a period of weeks or months
Mental and emotional health	464	Frequent crisis and / or severe problems	Reasonably stable emotionally over a period of weeks or months
Relationships	459	No significant relationships due to rejection by others, not fully engaged with service	Sustained healthy contact with significant relationships or positive separation
Personal responsibility	468	Not aware / acknowledging problem	Increased integration into "normal life" and becoming more independent of service
Social contact/ networks	466	Isolated or only social contact within a drug use or drinking culture	Integrated into social networks

Youth Treatment

The Youth Treatment typology covers the provision of community based early intervention services for young people aged 11 - 25 who are identified as having substance misuse difficulties.

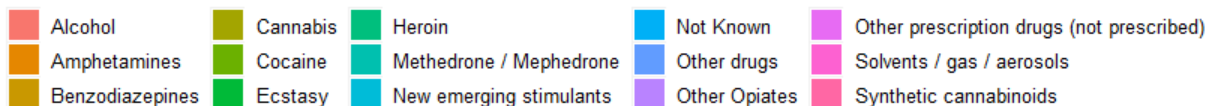

Client Overview

During 2021/22 the number of IMT clients whose treatment ended, or were otherwise discharged was **664**; of these a total number of **567 (85%)** clients had measurable impacts.

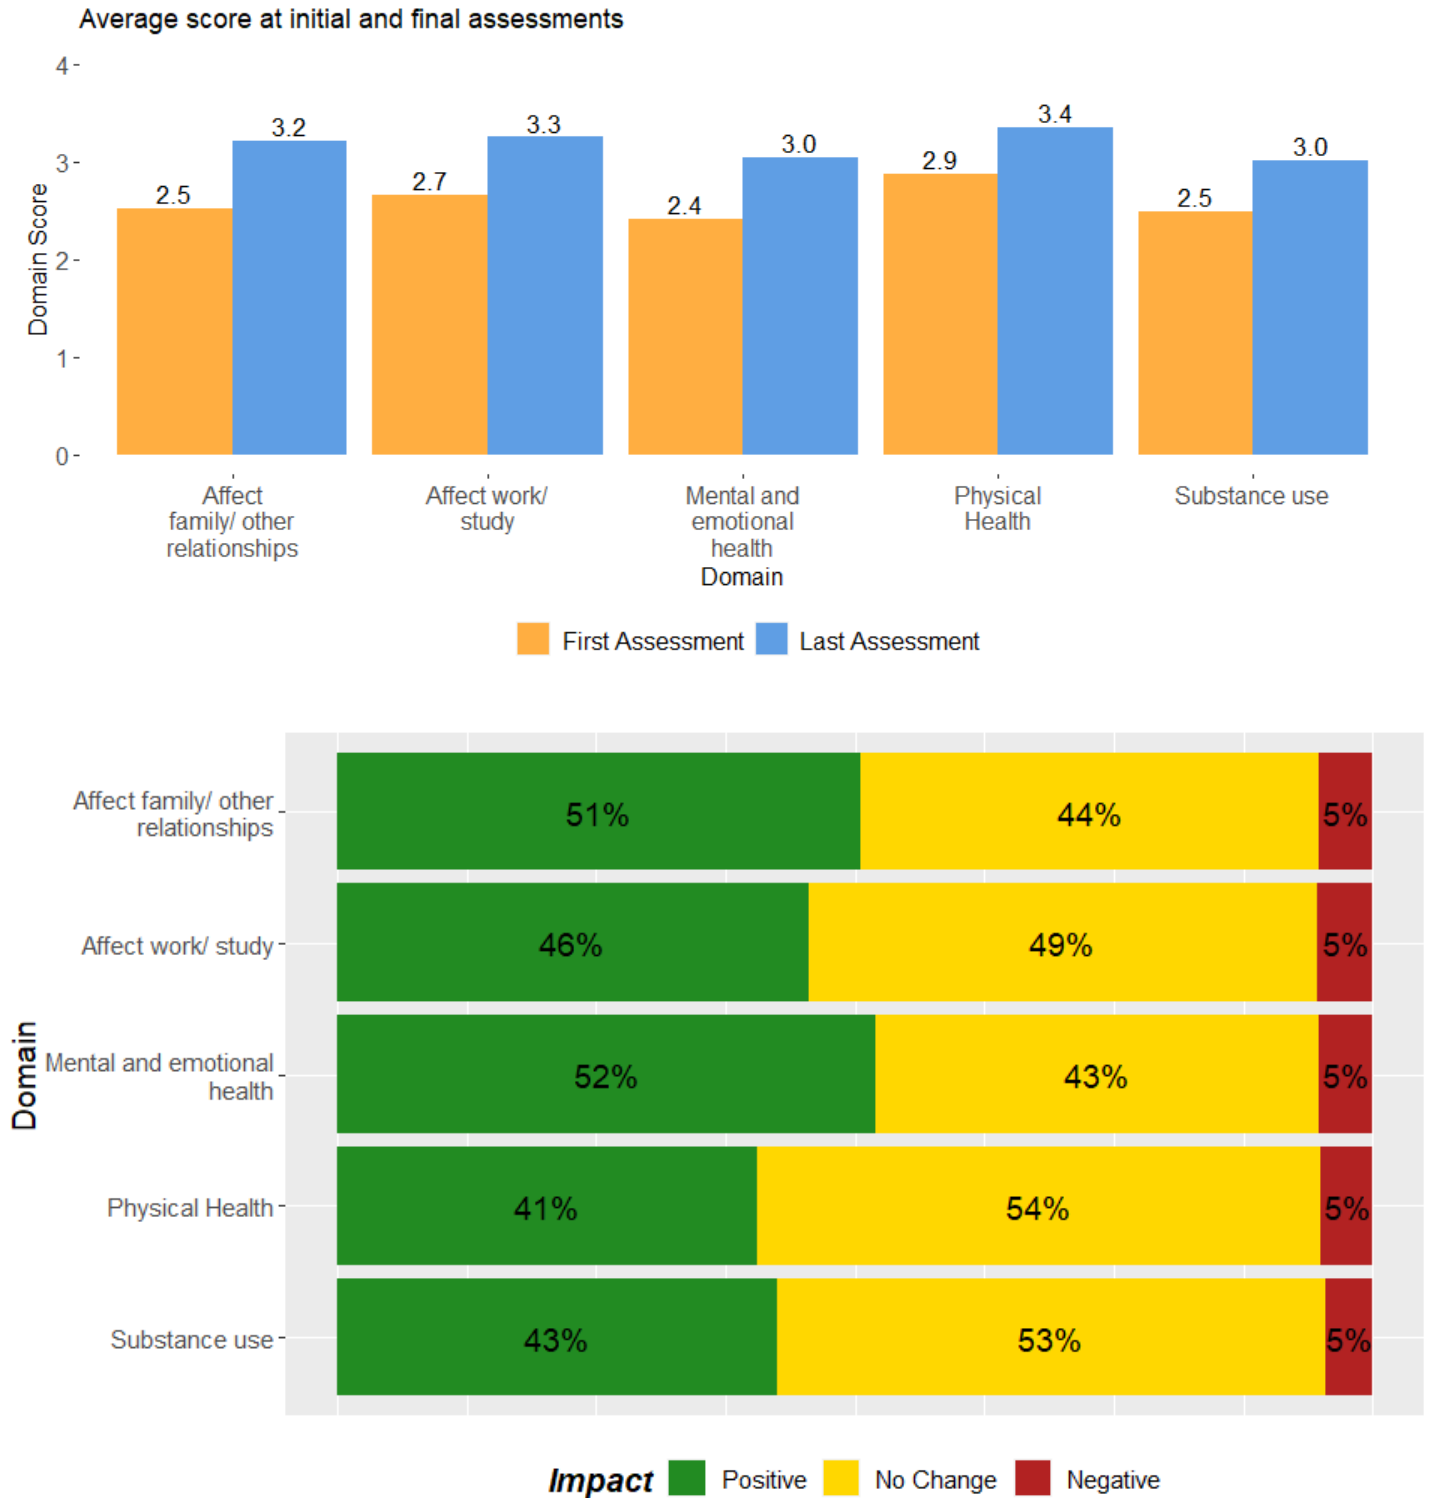

Main Substance Used

Total number of clients on IMT = 664

Impact by Domain

The table on the next page outlines the number of individuals that this data represents.

Youth treatment Domains

The following Youth treatment domains are measured, each given a score of 1 to 4; with 1 indicating highest risk or harm and 4 being lowest risk. The number of impact scores available is indicated by the base number of clients against each Domain.

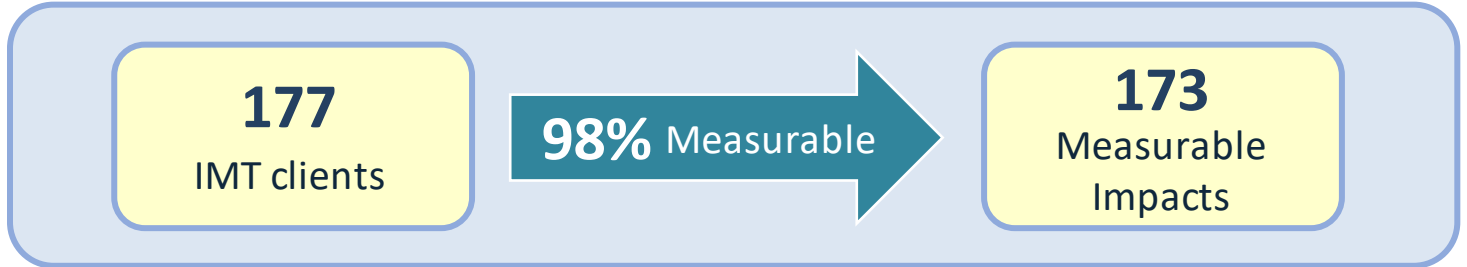

Domain	Base No. Clients	Domain Score - 1	Domain Score - 4
Mental and emotional health	567	Very Poor	Very Good
Physical Health	567	Very Poor	Very Good
Affect family / other relationships	566	Very badly	Not at all
Substance Use	567	Very high risk use significantly affecting day-to-day functioning	No Use
Affect work / study	567	Very badly	Not at all

Parental Substance Misuse

The Parental Substance Misuse typology collects data relating to the provision of therapeutic services for children, young people and families affected by parental substance misuse; it measures the progress of clients involved with these services across a number of key domains.

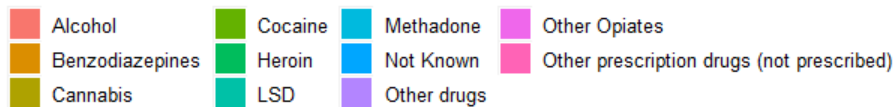

Client Overview

During 2021/22 the number of IMT families whose treatment ended, or were otherwise discharged was **177**; of these a total number of **173 (98%)** families had measurable impacts.

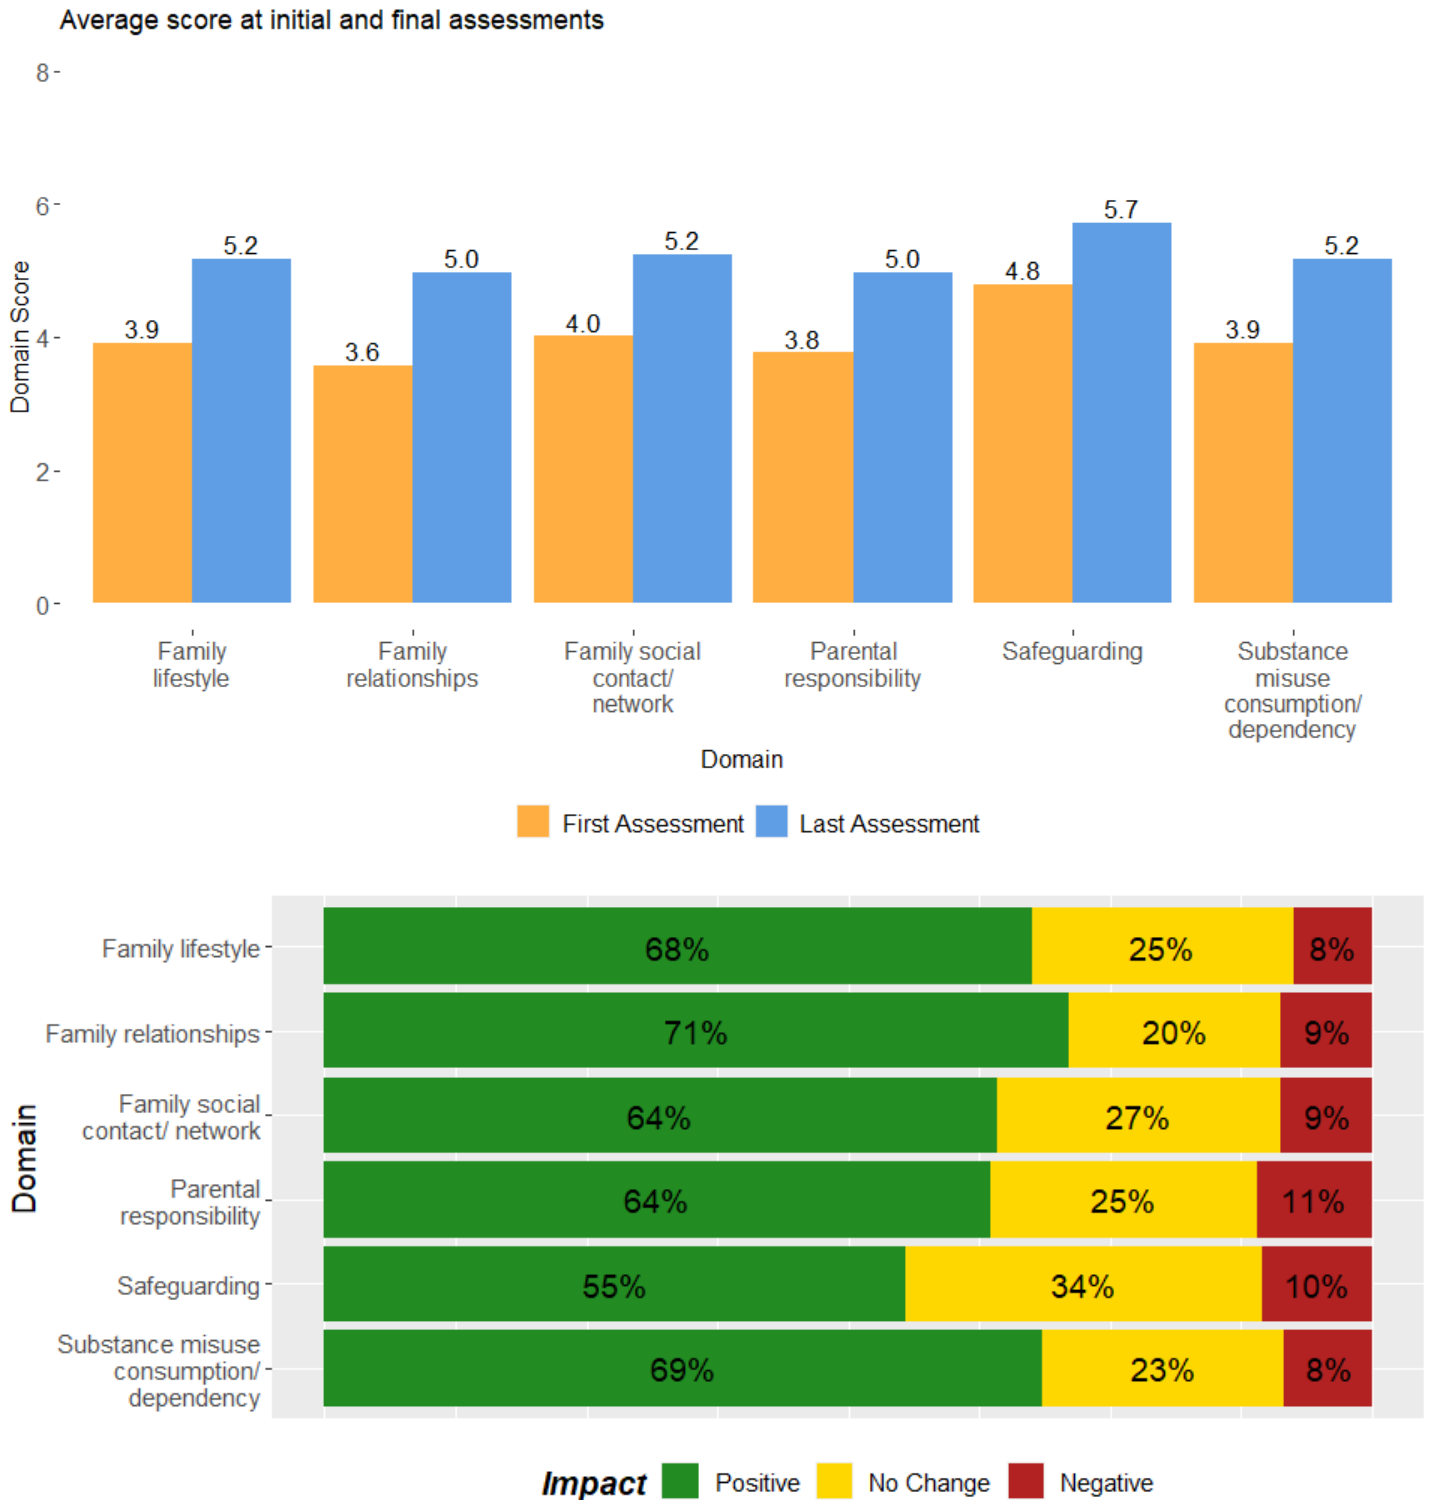

Main Substance Used

Total number of families = 177

Impact by Domain

The table on the next page outlines the number of families that this data represents.

Parental Substance Misuse Domains

The following Parental Substance Misuse treatment domains are measured, each given a score of 1 to 8; with 1 indicating highest risk or harm and 8 being lowest risk. The number of impact scores available is indicated by the base number of families against each Domain.

Domain	Base No. Clients	Domain Score - 1	Domain Score - 8
Family Lifestyle	173	Chaotic family lifestyle - lacks structure, routines, boundaries, appropriate activities	Changes maintained
Parental Responsibility	173	No awareness and/or acknowledgement	Fulfils parental responsibilities independently or with low level supports
Family Relationships	173	Family relationships dysfunctional, featuring e.g. conflict/ disharmony/lack of communication	Stable/functional relationships maintained
Safeguarding	173	Serious risks posed to safety, protection and well-being of child - no awareness/acknowledgement	No concerns regarding the safety, protection and well-being of the child
Family social contact/ network	173	Family/user isolated and little awareness of negative impact. Few social contacts outside drug using/drinking culture	Social contacts/ support networks relevant to family's/ individuals wishes and needs are established and maintained
Substance Misuse Consumption/ Dependency	108	Drinking/using drugs at harmful levels - e.g. continuous, patterned use	Effectively using strategies to avoid relapse - leaving treatment

Substance misuse consumption/dependency domain also includes the following options in addition to the scale 1 - 8:

X - Substance misusing parent is no longer in the family unit

N - Substance misusing parent is not attending Parental Misuse Treatment

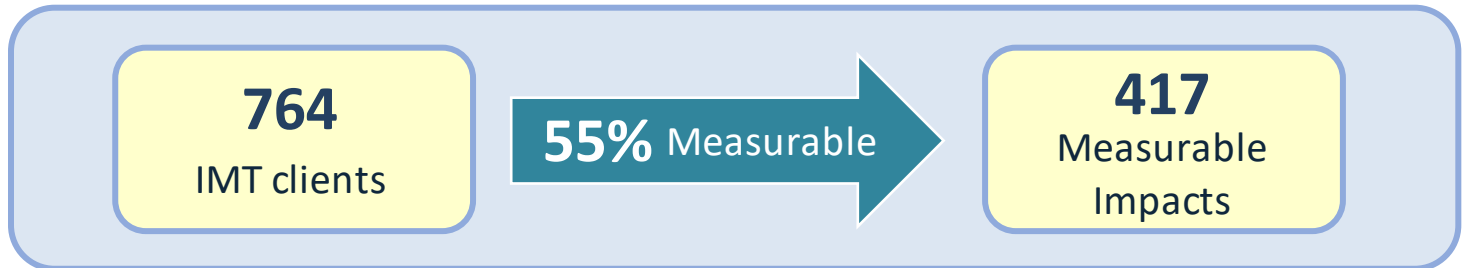

Low Threshold Services

Low threshold services IMT

The low threshold services typology covers the provision of support, care, facilitation and harm reduction services for people who are misusing substances; it measures the progress of clients involved with these services across a number of key domains.

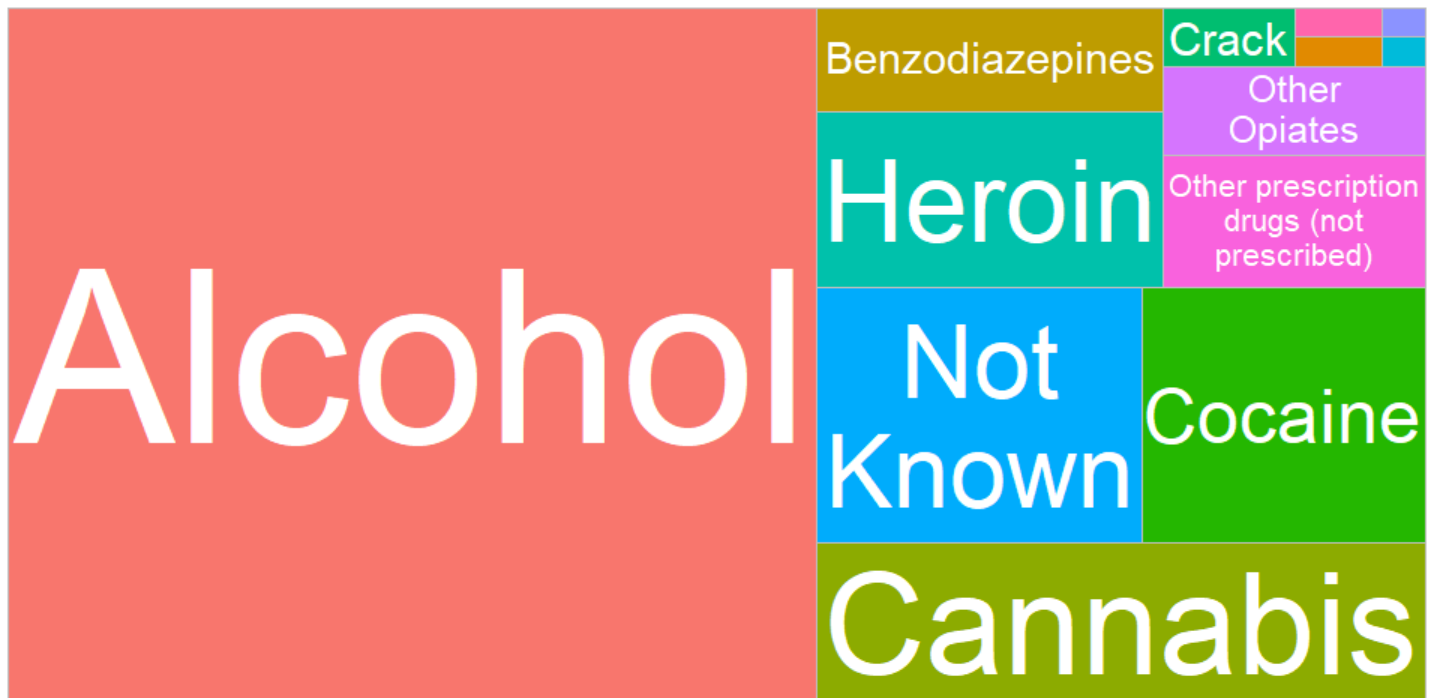

Client Overview

During 2021/22 the number of IMT clients whose treatment ended, or were otherwise discharged was **764**; of these a total number of **417 (55%)** clients had measurable impacts.

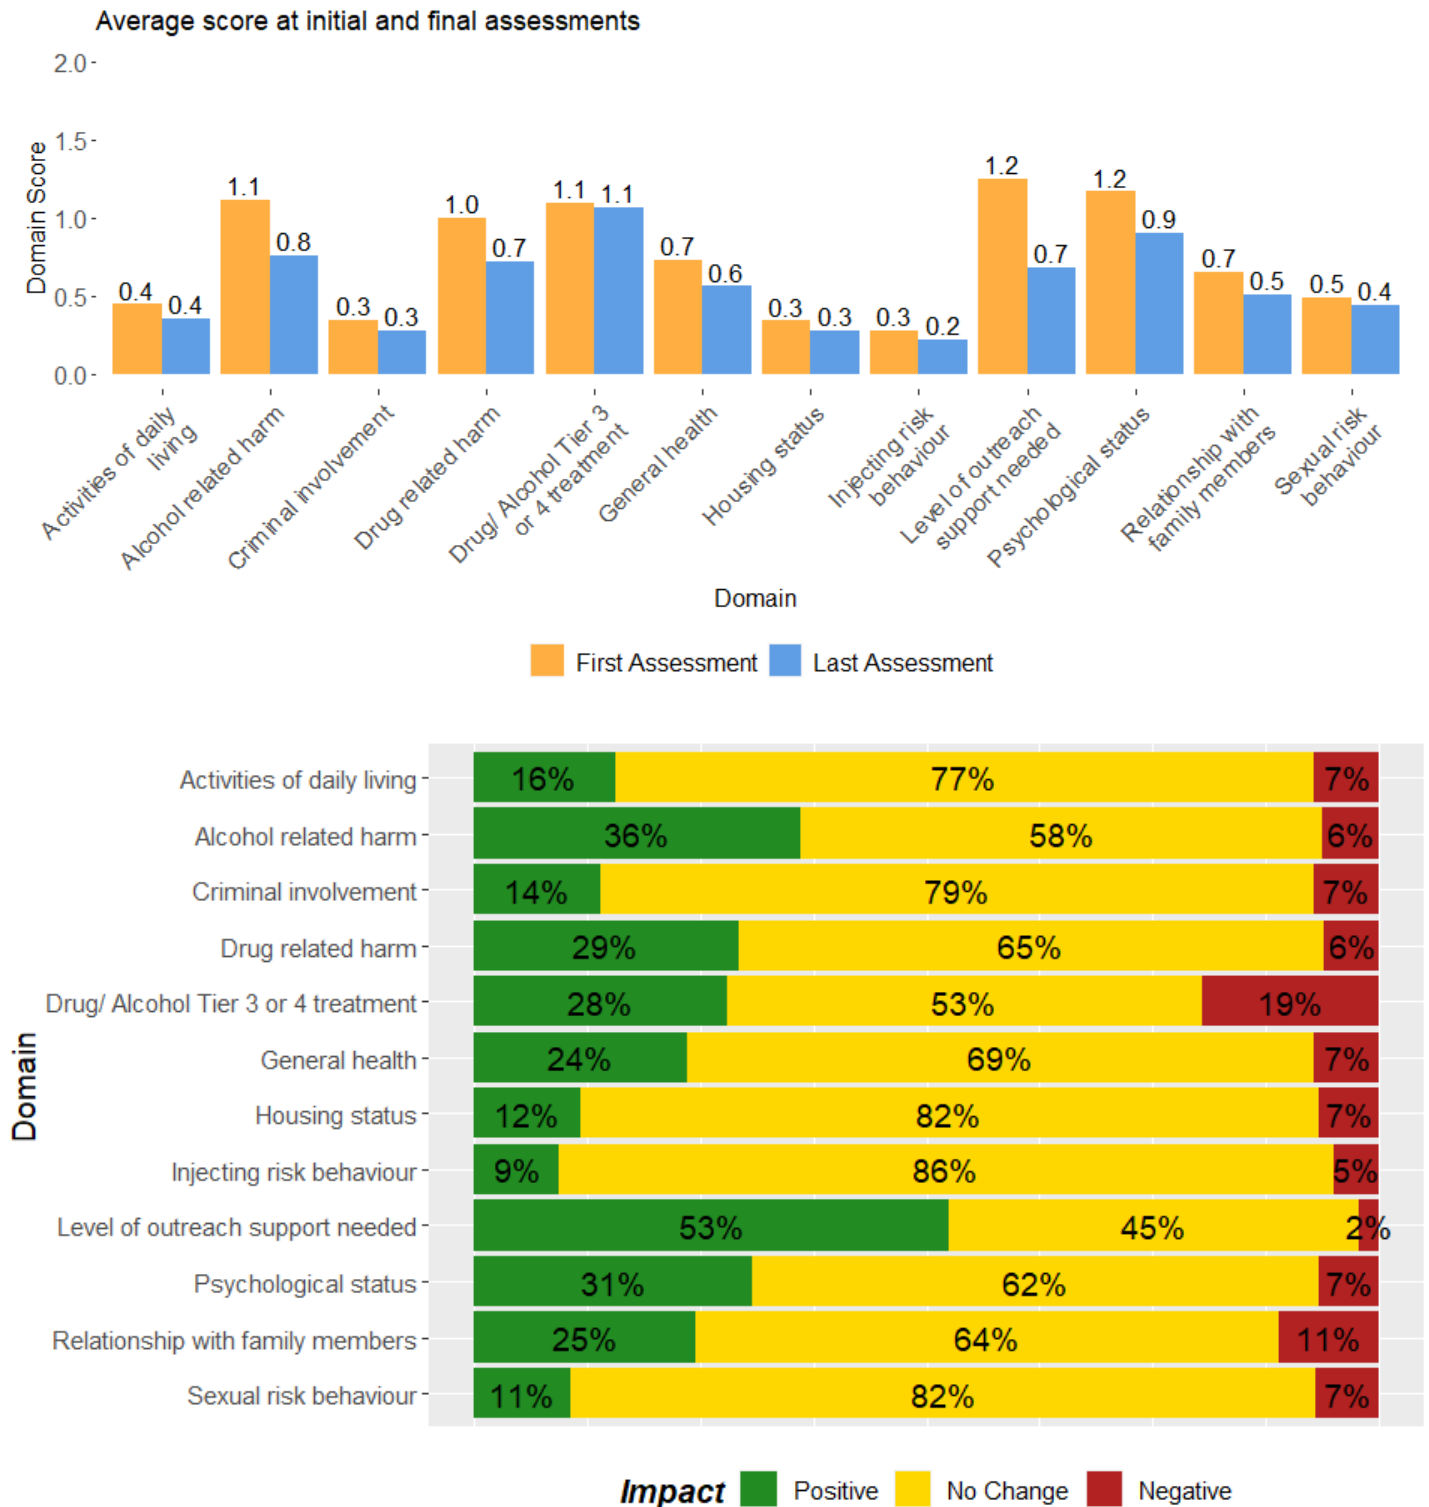

Main Substance Used

Total number of clients on IMT = 764

Impact by Domain

The table on the next page outlines the number of individuals that this data represents. *Please note that the scale used in this typology moves in the opposite direction to the previous typologies, with a lower score reflecting a more positive position.*

Note- The high proportion of clients seeing no change in several domains can be attributed in part to their first assessment being at zero (i.e. no reported difficulties in that given domain), thus no improvement could be made.

Low Threshold Domains

The following Low Threshold domains are measured, each receiving a score of 0, 1 or 2; with 2 indicating highest risk or harm and 0 being lowest risk. The number of impact scores available is indicated by the base number of clients against each Domain.

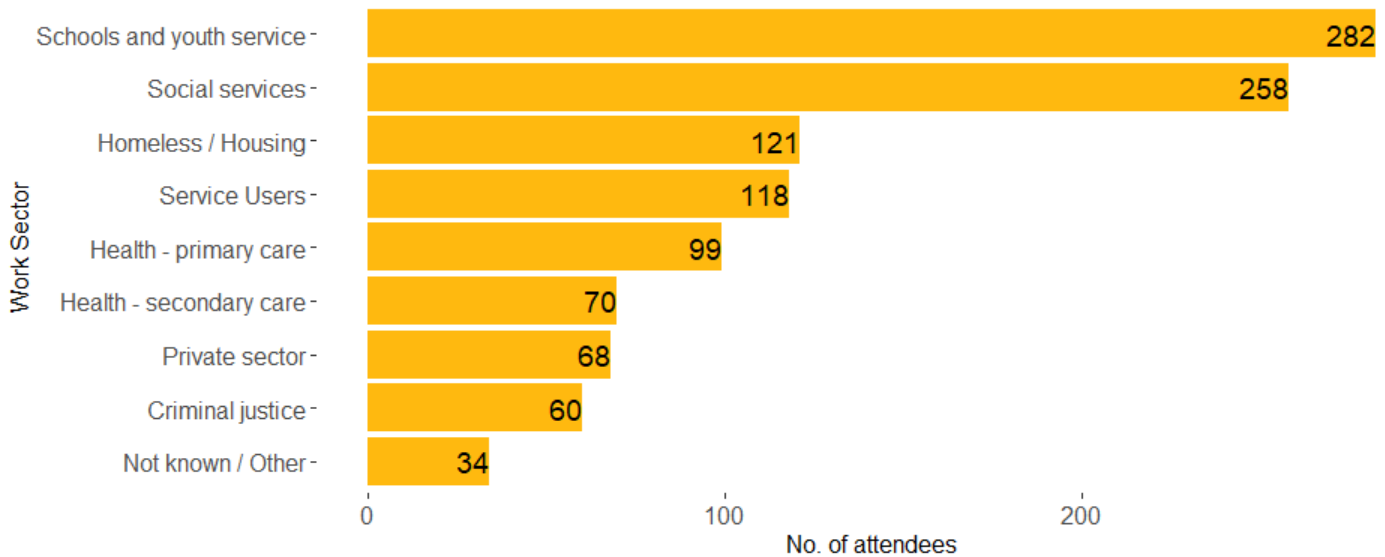

Domain	Base No. Clients	Domain Score - 0	Domain Score - 2
Alcohol related harm	399	Alcohol use is not causing/linked to any harm to the client	Alcohol use is causing/linked to significant harm to the client
Criminal involvement	416	Client has none/no recent criminal involvement	Client has increased criminal involvement
Activities of daily living	417	Client is managing daily activities	Client needs substantial help with daily activities
Drug related harm	264	Drug use is not causing/linked to any harm to the client	Drug use is causing/linked to significant harm to the client
General Health	417	Client has reported no significant health problems	Client has reported major health problems
Housing status	417	Client has permanent accommodation	Client is homeless
Injecting risk behaviour	139	Client states not injecting	Client injecting but not minimising risks
Psychological status	416	Client is managing or has no significant mental health problems	Client has a mental health problem that has a significant impact on their life
Relationship with family members	416	Regular healthy contact with significant individual/separated from bad relationship	No contact/strained relationship with significant individuals and children
Sexual risk behaviour	244	Client states abstinence	Client discloses unsafe sexual encounters
Level of outreach support needed	417	Client does not need/no longer needs support	Client continues to need a high level of support
Drug/ Alcohol Tier 3 or 4 treatment	190	Client is engaged in treatment/ aim achieved	Client has refused/left treatment

Workforce Development

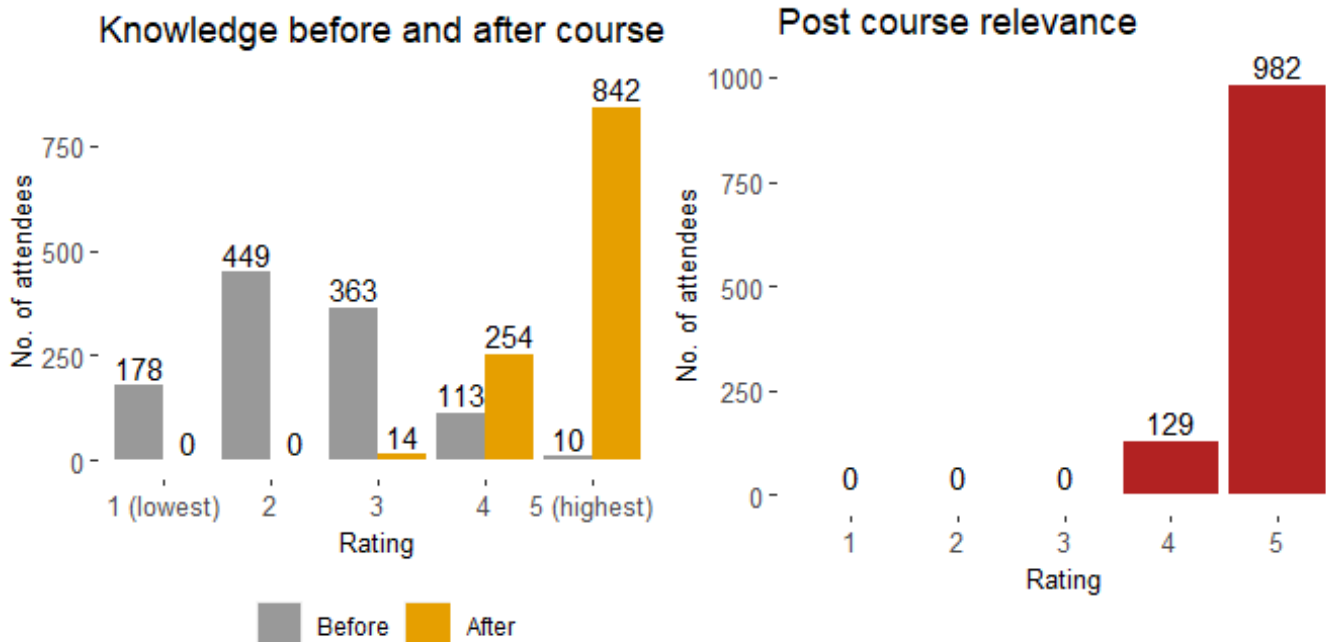

The Workforce Development typology collects data from agencies providing Workforce Development training for Alcohol and Drug workers. Participants complete a pre-course questionnaire to establish base knowledge, and similarly a post-course questionnaire including a rating for course relevance. The assessments are scored from one (lowest) to five (highest).

During 2021/22, there were **1,112** attendees at **145** workforce development courses held across agencies in Northern Ireland.

Work Sector of Attendees

Self-report Ratings

Targeted Prevention

The Targeted Prevention typology covers the provision of substance misuse education courses to young people in the form of life skills or harm reduction sessions. Attendees are asked a series of questions before and after training events regarding their behaviour (alcohol and drug use), knowledge (effects / risks & harm of alcohol and drugs) and attitudes (getting help for problem use and making decisions about alcohol/ drug use).

During 2021/22, **215** courses were undertaken with **1,800** young people recorded as having commenced the training and **1,545** young people as having completed.

Participants are asked to rate their knowledge on the following areas

- **Decisions, decisions - it's your choice**

How much do you know about the process of decision making?

- **Say what? - Effective Communication Skills**

How would you rate your own communication skills?

- **When the going gets tough - dealing with difficult emotions**

How good are you at recognising your feelings/emotions?

- **Health = Wealth? Looking after your health & wellbeing**

How much do you know about good health and wellbeing?

- **Like or Dislike - Media and its influence**

How much do you know about the influence of media?

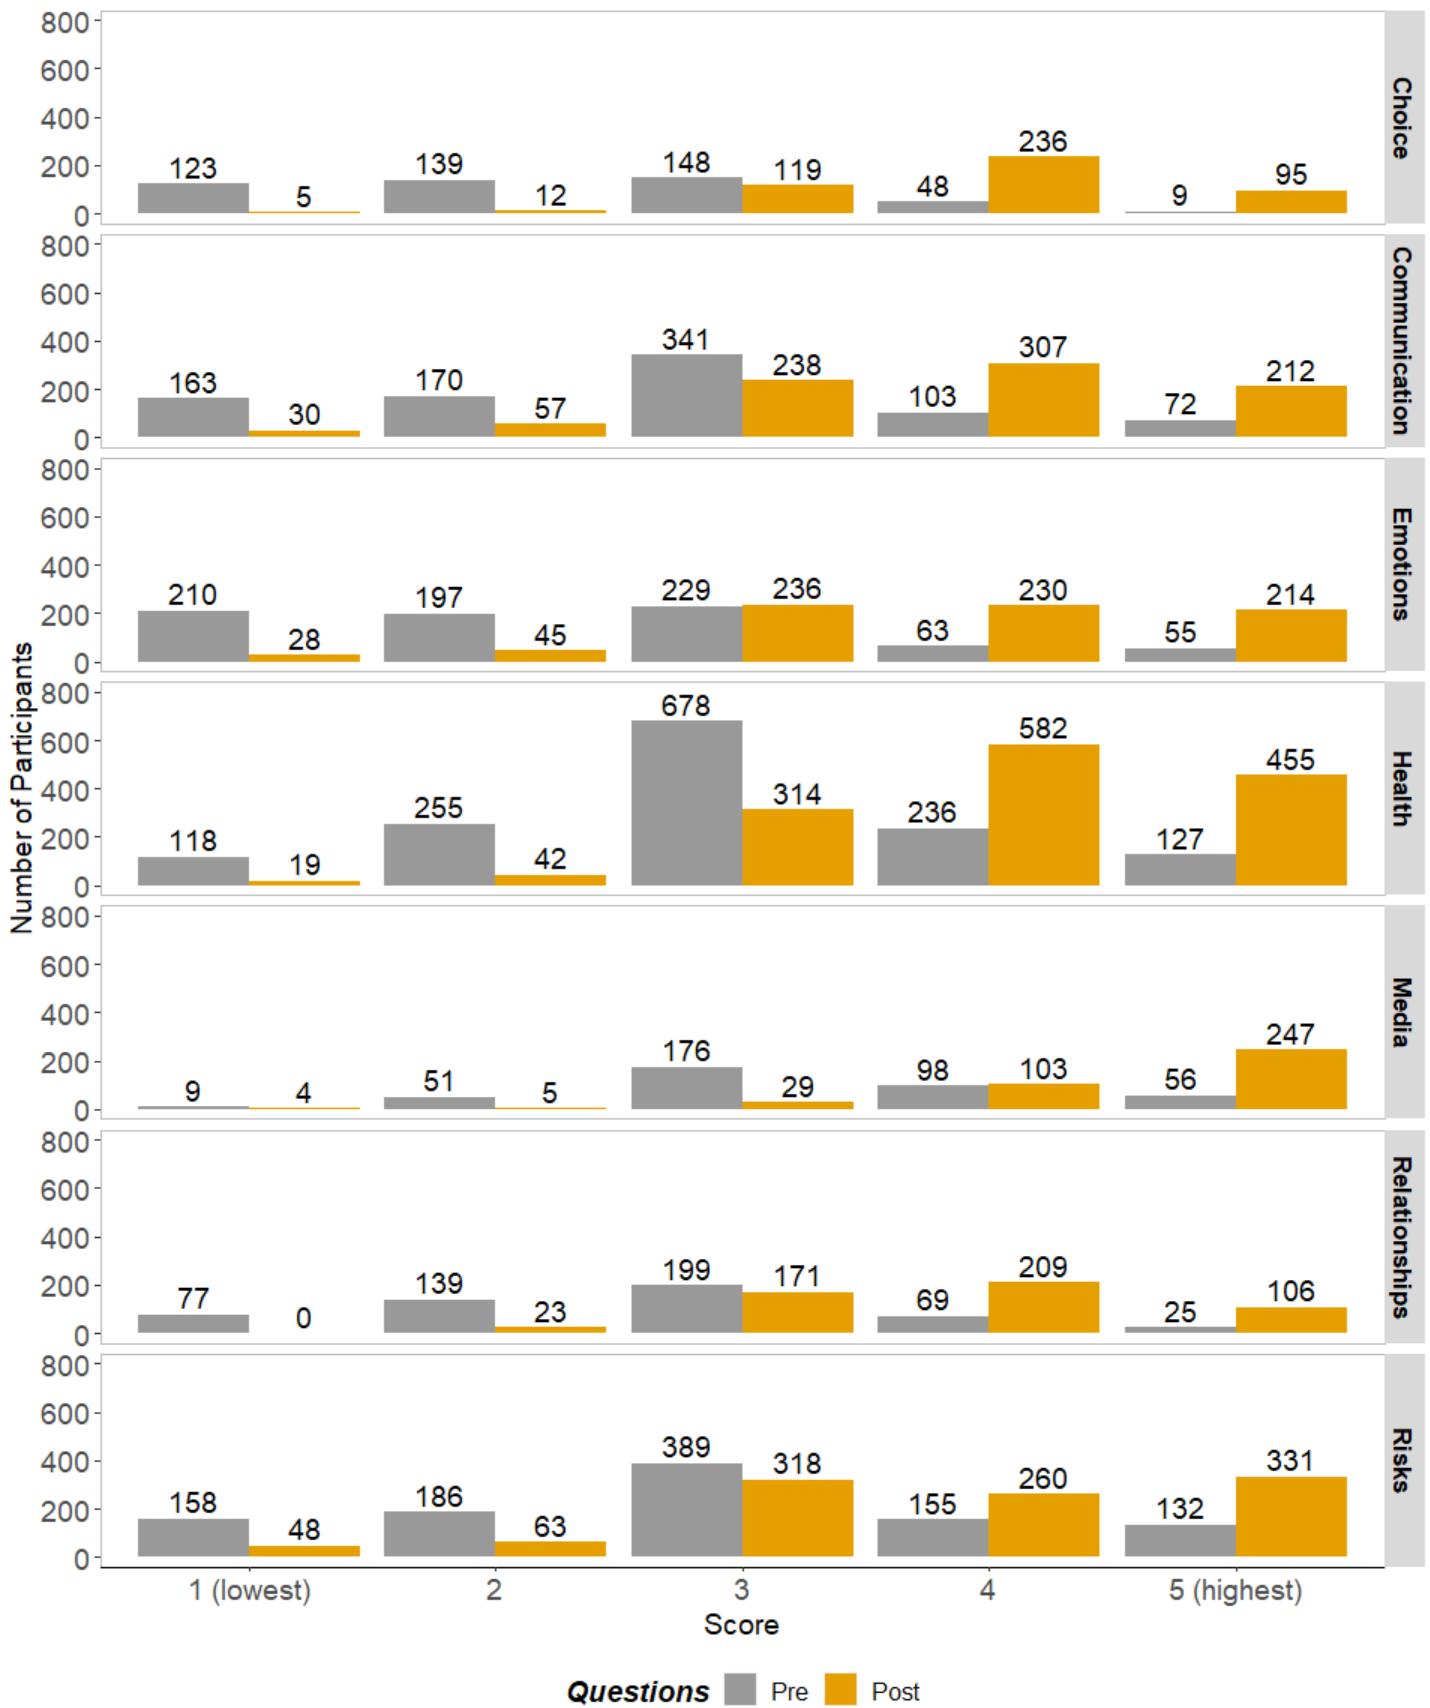

- **Family, Friends and Everything in Between - Relationships**

How much do you know about relationships and how they influence behaviour/their influence?

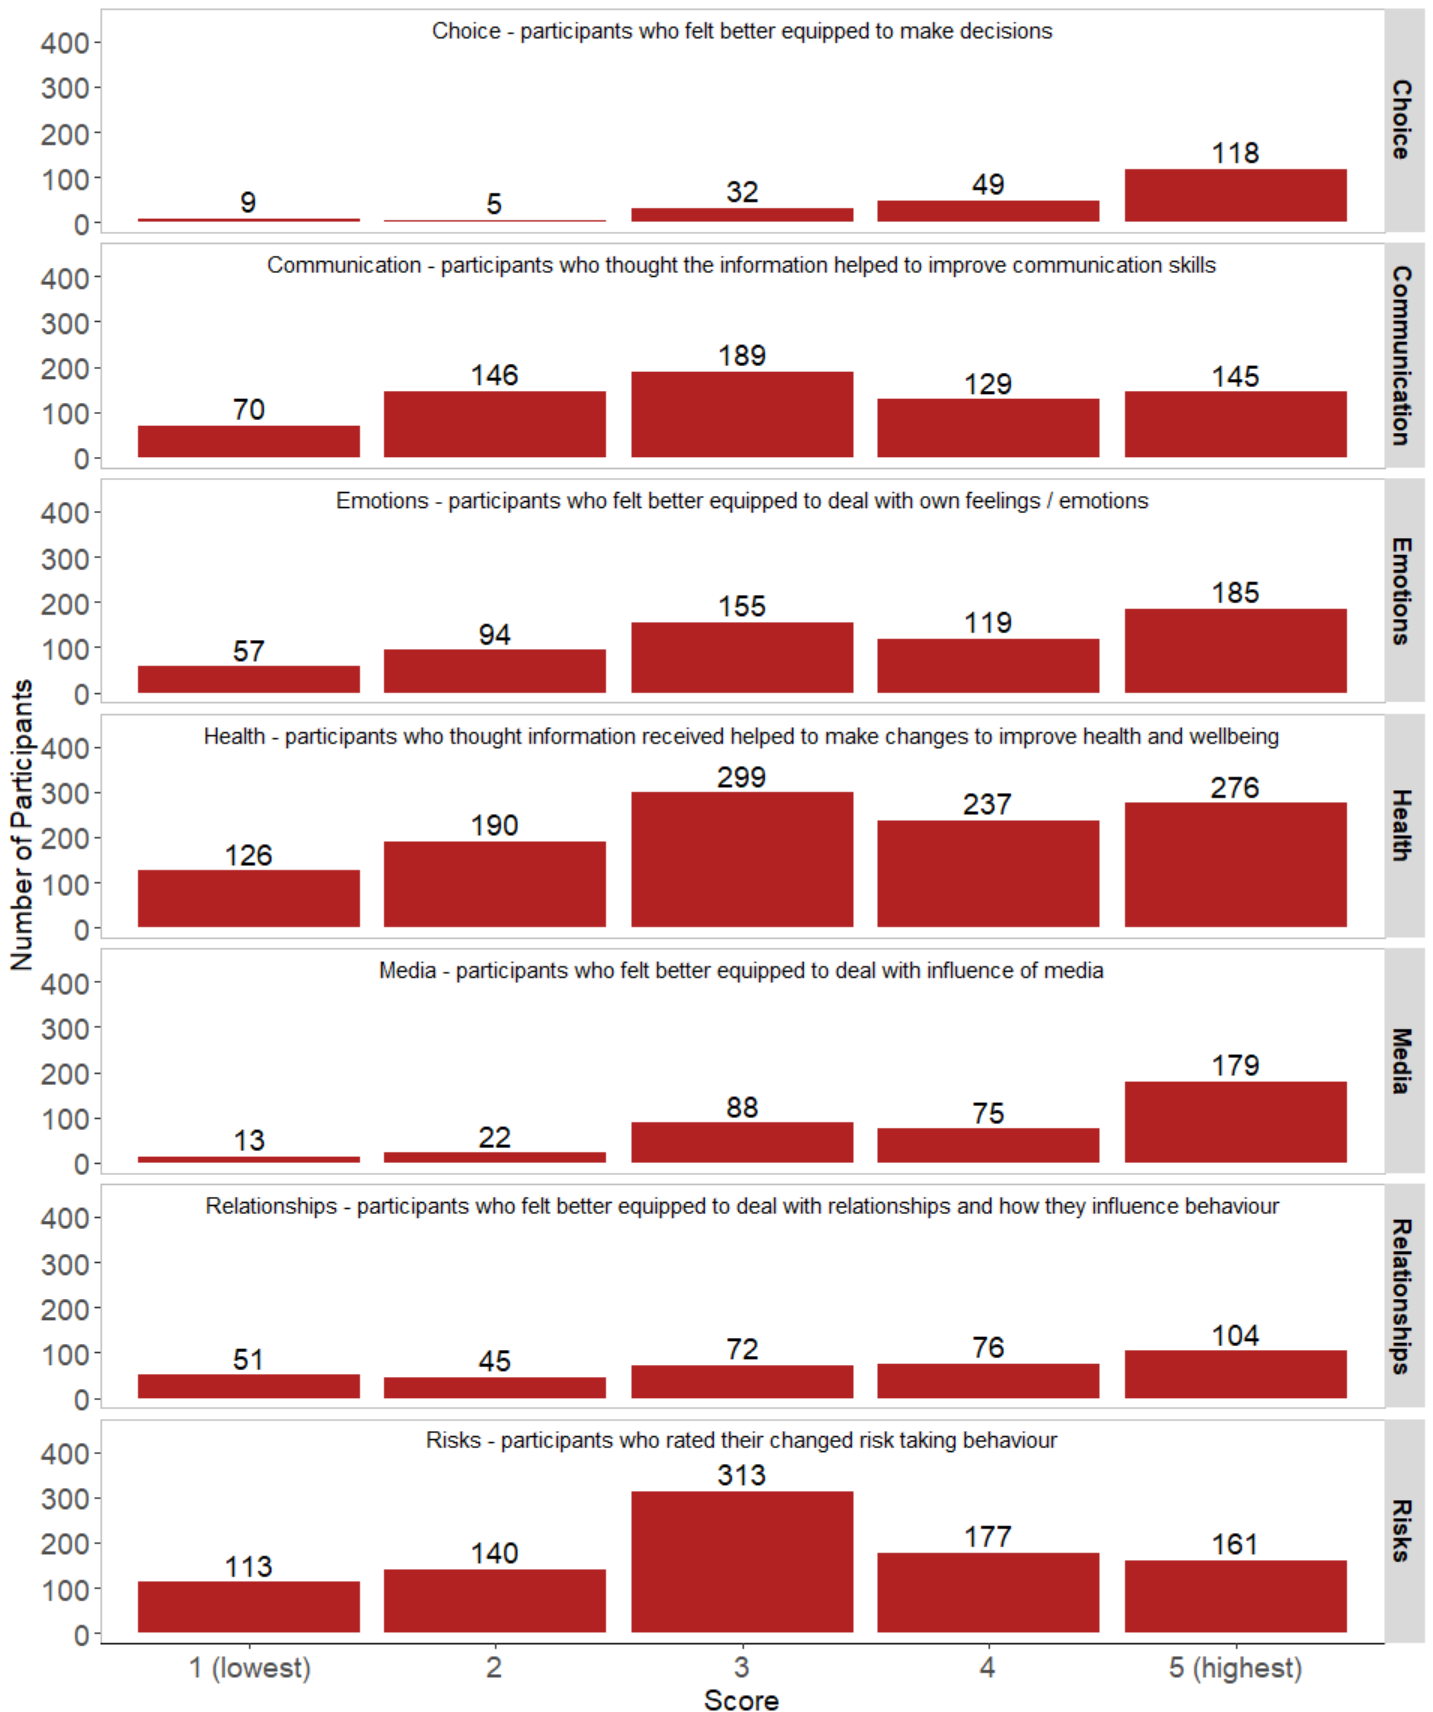

- **A risk worth taking? - Risk taking behaviour**

How likely are you to take risks?

Knowledge Before and After Course

Intended Behaviour Following Course

Targeted Prevention Harm Reduction courses

Attendees at Harm reduction modules are asked to indicate if they are currently using a substance (have used in the last month) and if they intend to use in future.

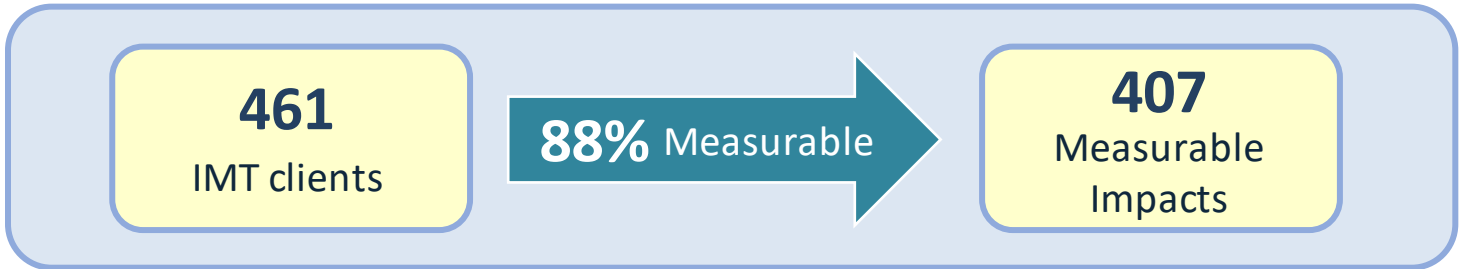

Module	No. of Courses	No. Clients	% Indicated using	% Intending to Use in future
Alcohol	99	702	64.1%	69.8%
Cannabis	41	320	50.6%	53.4%
Energy Drinks	29	185	69.7%	69.4%
Nicotine	5	39	74.4%	71.8%
Misuse of Medicines	1	6	66.7%	66.7%
New Psychoactive Substances	0	0	-	-
Stimulants	0	0	-	-
Solvents	0	0	-	-
Hallucinogens	0	0	-	-
Depressants	0	0	-	-
Opiates	0	0	-	-

Youth Engagement Services

Youth Engagement Service covers the provision of a youth friendly, holistic health and well-being service to young people (aged 11 - 25). The Youth Engagement typology captures those engagements that led to an in-depth assessment measuring the impact on well-being across a series of key domains.

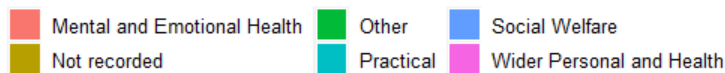

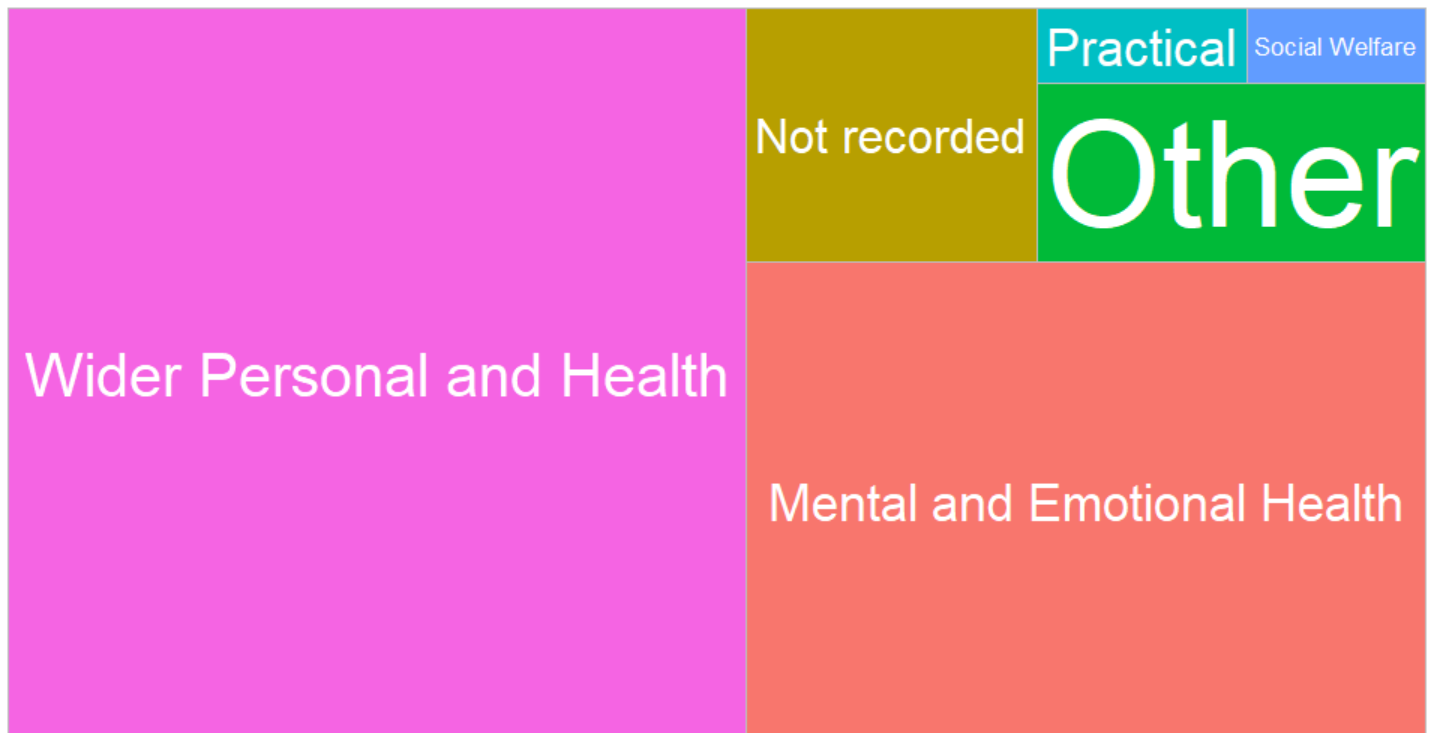

Client Overview

During 2021/22, the number of IMT clients whose treatment ended, or were otherwise discharged was **461**; of these a total number of **407 (88%)** clients had measurable impacts.

Primary Issue

Total number of clients on IMT = 461

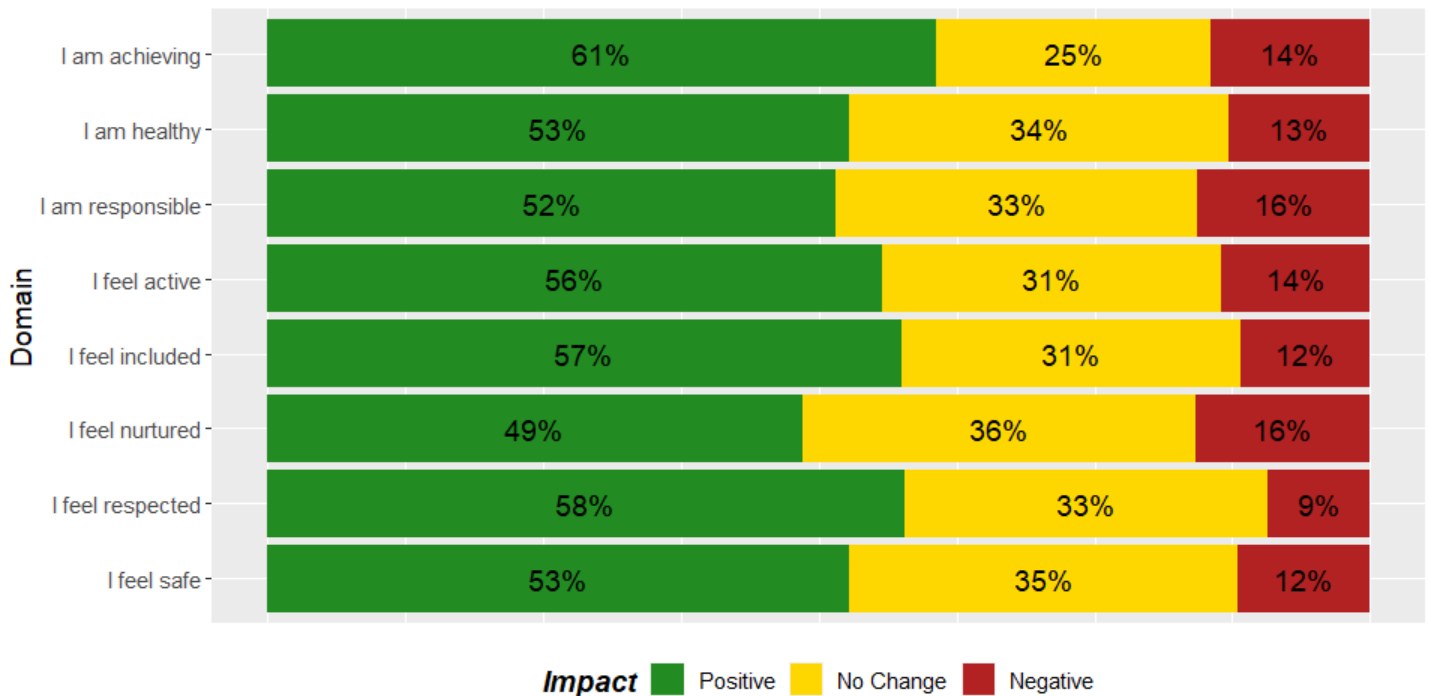

Youth Engagement Services Domains

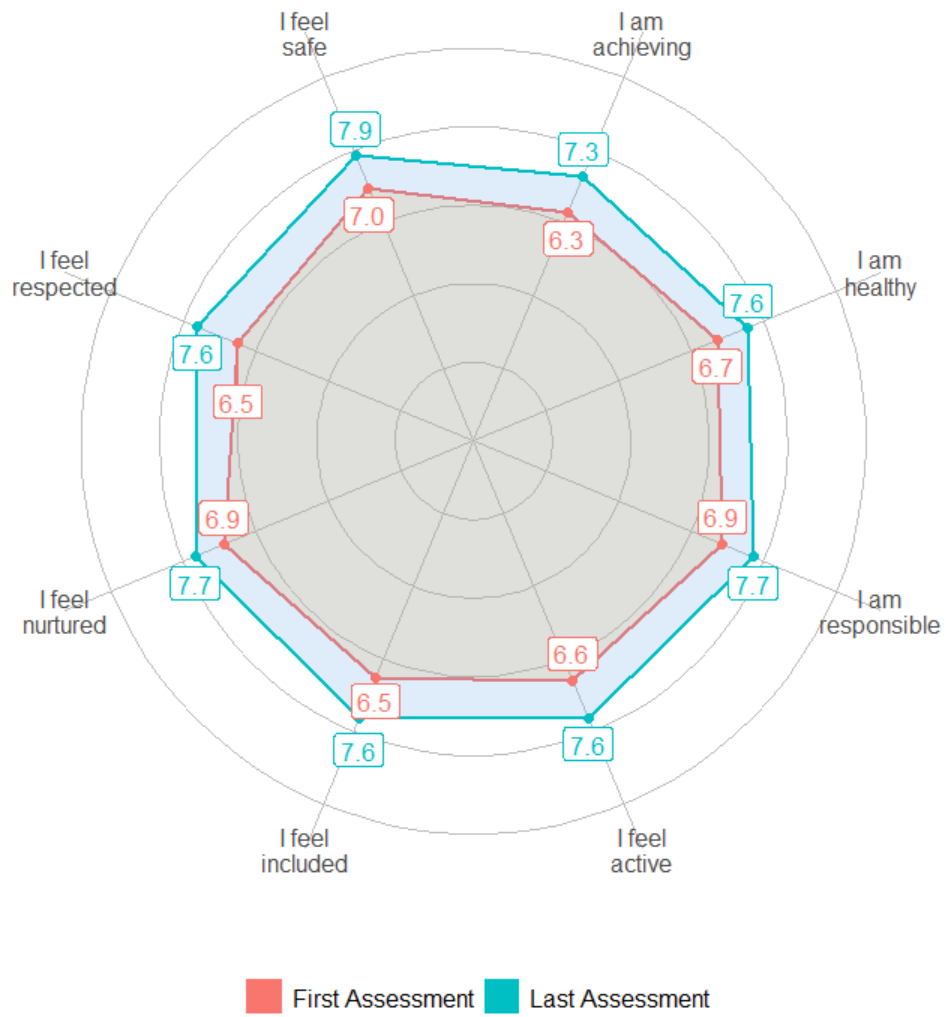

The following Youth engagement domains are measured, each given a score of 1 to 10; with 1 indicating “not true of me at all,” and 10 being “very true of me.” The number of impact scores available is indicated by the base number of clients against each Domain. The table below outlines the number of individuals that this data represents.

Domain	Base No. Clients
I am achieving	407
I am healthy	407
I am responsible	407
I feel active	407
I feel included	407
I feel nurtured	406
I feel respected	407
I feel safe	407
